the global economic crisis of 2008 2009 has had a broad impact far beyond economic concerns most importantly it has been seen as a crisis of governance and debates have not just questioned specific regulations e g of global financial markets but have additionally challenged the appropriateness of underlying governance concepts not only in global

markets but also at the national level for the post socialist countries which adopted market oriented governance mechanisms less than two decades ago the global crisis was the first stress test after the post socialist recovery the contributions in this book focus on the impact of the crisis and related reform attempts in two important areas the first area is financial and monetary policy which is at the core of the global crisis of 2008 2009 the second area is relations between business and state actors where corruption and weak institutional frameworks can both seriously hamper reform attempts the volume comprises essential contributions on how the post socialist countries have tried to cope with the first global economical crisis they saw themselves confronted with

written by a parent and school board member who first embraced many of the ideas of the modern school reform movement schoolhouse shams lays bare much of the mythology and misinformation that underpin many of the failed school reform policies of the last decade many of the top strategies of the highly publicized school reform movement already have been tried out in st louis with disastrous results along with demonstrating the failure of school reform prescriptions to improve education the experience of st louis demonstrates that the ideological premise of the reform movement that a focus on providing opportunities for private profit taking will necessarily improve schools is both wrong and conflicts with the ideals of democracy accountability and justice

there has been an increase in awareness and perhaps occurrence of individual and organized cheating on tests recent reports of widespread problems with state student accountability tests and teacher certification testing have raised questions about the very validity of assessment programs while there are several books that specifically detail the issues of test security cheating on assessments few outline the statistical procedures used for detecting various types of potential test fraud and the associated research findings without a significant research literature base the new generation of researchers will have little opportunity or incentive to improve on existing methods enlisting a variety of experts and scholars in different fields of testing this edited volume expands on the current literature base by including examples of detailed research findings arrived at by statistical methodology it also provides a synthesis of the current state of the art with regard to the statistical detection of testing infidelity particularly for large scale assessments by presenting methods currently used by testing organizations and research on new methods the volume offers an important forum for expanding the literature in this area

this volume explores the concept of citizenship and argues that it should be understood both as a process of becoming and the ability to participate fully rather than as a status that can be inherited acquired or achieved from a courtroom in bulawayo to a nursery in birmingham the authors use local contexts to foreground how the vulnerable particularly those

from minority language backgrounds continue to be excluded whilst offering a powerful demonstration of the potential for change offered by individual agency resistance and struggle in addressing questions such as under what local conditions does citizenship happen what role do language policies and pedagogic practices play and what kinds of margins and borders keep humans from fully participating the chapters in this volume shift the debate away from visas and passports to more uncertain and contested spaces of interpretation
