the book brings together diverse views from around the world and provides a comprehensive overview of academic integrity and how to create the ethical academy at the same time the handbook does not shy away from some of the vigorous debates in the field such as the causes of academic integrity breaches there has been an explosion of interest in academic integrity in the last 20 30 years new technologies that have made it easier than ever for students to cut and paste coupled with global media scandals of high profile researchers behaving badly have resulted in the perception that plagiarism is on the rise this in combination with the massification and commercialisation of higher education has resulted in a burgeoning interest in the importance of academic integrity how to safeguard it and how to address breaches appropriately what may have seemed like a relatively easy topic to address students copying sources without attribution has in fact turned out to be a complex interdisciplinary field of research requiring

contributions from linguists psychologists social scientists anthropologists teaching and learning specialists mathematicians accountants medical doctors lawyers and philosophers to name just a few because of this broad interest and input this handbook serves as the single authoritative reference work which brings together the vast growing interdisciplinary and at times contradictory body of literature for both established researchers practitioners and those new to the field this handbook provides a one stop shop as well as a launching pad for new explorations and discussions

the covid 19 pandemic pushed education from schools to educational technologies at a pace and scale with no historical precedent for hundreds of millions of students formal learning became fully dependent on technology whether internet connected digital devices televisions or radios an ed tech tragedy examines the numerous adverse and unintended consequences of the shift to ed tech it documents how technology first solutions left a global majority of learners behind and details the many ways education was diminished even when technology was available and worked as intended using tragedy as a metaphor and borrowing the organization of a three act theatrical play the book shows how technology first modes of learning introduced novel health and safety risks handed significant control of public education to for profit companies expanded invasive digital surveillance and carried detrimental environmental repercussions in addition to adversely impacting educational access equity quality and outcomes in most contexts dedicated sections consider alternative and less technology reliant educational responses to covid 19 disruptions that had the potential to be more inclusive and equitable the analysis further explains how pandemic models of learning are rippling beyond school closures and influencing the future of education holistically the work invites readers to reconsider a turbulent chapter in education history and reexamine the purposes and roles of technology in education

this contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies the chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education in this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding to link the content to current events the authors also shed light on the impact that the covid 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come

this book explores how existentialism helps teachers understand their existential responsibility it argues that teachers lived experiences and subjective meanings are crucial often differing from professional dictates the philosophy encourages authentic engagement with isolation freedom and meaning

this book reimagines education in today s artificial intelligence ai world and the fourth industrial revolution artificial intelligence will drastically affect every industry and sector and education is no exception this book aims at how ai may impact the teaching and learning process in education this book is designed to demystify ai for teachers and learners this book will help improve education and support institutions in the phenomena of the emergence of ai in teaching and learning this book presents a comprehensive
