the outbreak of the coronavirus in early 2020 resulted in unprecedented changes to health professions education the pervasive stay at home orders resulted in faculty who were trained for preparing the next generation of health professionals in a traditional learning environment throwing out their lesson plans and starting anew new approaches to teaching and learning were created quickly and without the typical extensive planning which introduced several challenges however lessons learned from these approaches have also resulted in increased technology adoption innovative assessment strategies and increased creativity in the learning environment the handbook of research on updating and innovating health professions education post pandemic perspectives explores the various teaching and learning strategies utilized during the pandemic and the innovative approaches implemented to evaluate student learning outcomes and best practices in non traditional academic situations and environments the chapters focus specifically on lessons learned and best practices in health professions education and the innovative and exciting changes that

occurred particularly with the adoption and implementation of technology it provides resources and strategies that can be implemented into the current educational environments and into the future this book is ideal for inservice and preservice teachers administrators teacher educators practitioners medical trainers medical professionals researchers academicians and students interested in curriculum course design development of policies and procedures within academic programs and the identification of best practices in health professions education

the integration of digital technologies into medical education plays a vital role in equipping future healthcare professionals with the skills needed in an increasingly complex clinical landscape by enhancing interactivity accessibility and real time simulation technology supports more effective and engaging learning experiences it also fosters global collaboration encourages lifelong learning and ensures that training keeps pace with rapid advancements in medical science ultimately digital innovation in education contributes to safer more efficient healthcare systems that better serve society's evolving needs teaching in the age of medical technology provides relevant theoretical frameworks and the latest findings from empirical research in the field of digital medical education it explores the use of digital technologies and their application in an international context covering topics such as 3d printing mobile learning and wearable technology this book is an excellent resource for medical educators medical professionals researchers academicians and more

bringing together a diverse collection of authors to examine the concept of one health the interlinking of the economy and the health of humans other living beings and nature piero formica investigates how transformative enterprises and advanced technologies can improve the health of the planet and its people

this pioneering book edited by terhi anna wilska and jussi nyrhinen examines how young people's agency in differing digital landscapes intersects with areas such as communication economy work and leisure the book analyses various risks and opportunities related to social media and other digital platforms and provides recommendations to enhance young people's influence and competence in digital environments

the perceived value of philosophy to medical education is increasing but beyond the occasional application of philosophical concepts what does it mean to be philosophical about medical education and to do philosophy to create new concepts and ways of thinking about what medical education is the complex and dynamic nature of academic medicine requires medical educators to reflect on their practices to question assumptions and to embrace the ambiguity of a world that cannot be captured by any one model or theory this volume explores

philosophy as a practice in medical education we use persistent problems that vex medical educators as a starting point to do philosophy asking fundamental questions to probe them how are teaching and learning related how do we educate the value of personal experience relative to scientific evidence we also challenge the assumptions underlying these problems with alternatives what if teaching does not cause learning what if we cannot divide our inner and outer world we then explore ways forward if we cannot cause learning how do we reconceptualize the educational process how do we help physician trainees critically reflect on medical epistemology throughout their professional development each chapter explores one theme in medical education e g education science inequality technology mortality from a philosophical perspective opening it up to fundamental re examination and inviting readers to continue exploration beyond the printed words this book is a step towards enabling medical educators to practice philosophy themselves at appropriate moments in their work in this way it aims to establish medical education as a mature field with its own philosophy the chapters in this book were originally published in the journal teaching and learning in medicine

from a field developed out of the need to train military personnel at scale to its current role in enabling virtual learning and training experiences instructional design has developed into a complex multifaceted discipline the modern instructional design process goes by many names e g learning experience design learning engineering training and development organizational development and continues to adapt with continual changes in society and skill development needs from mobile to remote learning as well as online and traditional classrooms instructional designers are faced with meeting the learner where they are to design authentic and engaging learning experiences additionally learning development needs have expanded outside of formal learning into professional development on the job training and continuous learning
