in this pioneering work paul r abramson and ronald inglehart show that the gradual shift from materialist values such as the desire for economic and physical security to post materialist values such as the desire for freedom self expression and the quality of life is in all likelihood a global phenomenon value change in global perspective analyzes over thirty years worth of national surveys in european countries and presents the most comprehensive and nuanced discussion of this shift to date by paying special attention to the way generational replacement transforms values among mass publics the authors are able to present a comprehensive analysis of the processes through which values change in addition value change in global perspective analyzes the 1990 91 world values survey conducted in forty societies representing over seventy percent of the

world's population these surveys cover an unprecedentedly broad range of the economic and political spectrum with data from low income countries such as China, India, Mexico and Nigeria, newly industrialized countries such as South Korea and former state socialist countries in Eastern Europe and the former Soviet Union. This data adds significant new meaning to our understanding of attitude shifts throughout the world. Value change in global perspective has been written to meet the needs of scholars and students alike. The use of percentage, percentage differences and algebraic standardization procedures will make the results easy to understand and useful in courses in comparative politics and in public opinion. Paul R. Abramson is professor of political science, Michigan State University. Ronald Inglehart is professor of political science and program director, Institute for Social Research, University of Michigan.

This popular book provides a compelling introduction to thinking about childhood in rigorous and critical ways. Karen Wells offers a unique global perspective on children's lives, showing how the notion of childhood varies widely and is continuously being radically reshaped. Taking children seriously as active participants in society, the book explores key social issues such as how children are constituted as raced, classed, and gendered subjects; how school and work operate as sites for the governing of childhood; and how children both shape and are shaped by politics, culture, and the economy. Taking an engaging historical and comparative approach, the book discusses wide-ranging topics including children's rights, the family, play, labour, migration, and trafficking. In addition to updated literature throughout this revised third edition includes extensive new material on children's activism, politics, and war, and a whole new chapter on juvenile justice. The book will continue to be of great value to students and scholars in the fields of sociology, geography, social policy, and development studies. It will also be a valuable companion to
