the german wehrmacht was one of the most capable fighting forces the world has ever known but in the end it was no match for the allies some historians contend that the allies achieved victory through brute force and material superiority but as peter mansoor argues all of the material produced by us industry was useless without trained soldiers to operate it a coherent doctrine for its use and leaders who could effectively command the formations into which it was organized

it seemed that whenever mussolini acted on his own it was bad news for hitler indeed the fuhrer's relations with his axis partners were fraught with an almost total lack of coordination compared to the allies the coalition was hardly an alliance at all focusing on germany's military relations with italy romania hungary and finland richard dinardo unearths a wealth of information that reveals how the axis coalition largely undermined hitler's objectives from the eastern front to the balkans mediterranean and north africa dinardo argues that the axis military alliance was doomed from the beginning by a lack of common war aims the absence of a unified command structure and each nation's fundamental mistrust of the others germany was disinclined to make the kinds of compromises that successful wartime partnerships demanded and because hitler insisted on separate pacts with each nation italy and finland often found themselves conducting counterproductive parallel wars on their own dinardo's detailed assessments of ground naval and air operations reveal precisely why the axis allies were so dysfunctional as a collective force sometimes for seemingly mundane but vital reasons a shortage of interpreters for example his analysis covers coalition warfare at every level demonstrating that some military services were better at working with their allies than others while also pointing to rare successes such as rommel's effective coordination with italian forces in north africa in the end while some individual axis units fought with distinction if not on a par with the vaunted wehrmacht and helped germany achieve some of its military aims the coalition's overall military performance was riddled with disappointments breaking new ground dinardo's work enlarges our understanding of germany's defeat while at the same time offering a timely reminder of the challenges presented by coalition warfare

this monograph examines the deposition of precious metal artefacts in the late roman and early byzantine periods from c ad 200 to ad 700 within and beyond the frontiers of the roman empire and its successor states the primary foci of the study are the size date range and spatial distribution of these finds with less emphasis on specific aspects of artefacts themselves and the specific contexts in which individual deposits were found the immense chronological and regional scope allows broad changes in deposition patterns to be presented and examined and a variety of possible interpretations of these patterns are offered in the final chapter
