who since weber or perhaps even hobbes has done as much to show why power is such a profound elusive and treacherous presence throughout our experience the times higher education the third and final volume of the essential works of foucault series power brings together his writings on the issues that he helped make the core agenda of western political culture medicine prisons psychiatry government and sexuality in particular showing his concerns with human rights discrimination and exclusion it also includes articles and open letters published directly in response to the issues of the time calling for reform in abortion asylum and the death penalty all the pieces here bring a new sense of foucault s huge influence on the politics of personal freedom edited by james d faubion translated by robert hurley and others

the latest book in the new press s essential series collects key texts from the influential french philosopher few philosophers have had as significant an impact on contemporary thought as michel foucault his complete uncollected writings under the title dits et ecrits were published in french in 1994 and in a three volume series from the new press that brought the most important of these workscourses articles and interviews many of them translated into english for the first timeto american readers now paul rabinow and nikolas rose have collected the best pieces from the three volume set into a one volume anthology the essential foucault which features a new and provocative introduction by rabinow and rose is certain to become the standard text for all those interested in a comprehensive overview of foucault s thought

the final volume in the definitive collection of foucault s articles interviews and seminars power the final volume of essential works of foucault 1954 1984 draws together philosopher michel foucault s contributions to what he saw as the still underdeveloped practice of political analysis it covers the domains foucault helped to make part of the core agenda of western political culture medicine psychiatry prisons sexuality illuminating and expanding on the themes of the birth of the clinic discipline and punish and the first volume of the history of sexuality power includes important later writings and it highlights foucault s revolutionary analysis of the politics of personal conduct and freedom it also documents foucault s wide ranging involvements through lectures articles and interviews published throughout the world many unavailable in english until now

foucault christianity and interfaith dialogue develops a new model for interfaith dialogue using the work of the french historian of ideas michel foucault the author argues that it is the injustice done to the other by roman catholic protestant and other centred and unitary models of religious pluralism that allows the introduction of foucault s de centring of transcendence and human reason as an alternative model for understanding religious diversity and the role it ought to play in the constitution of the self and the making of society this foucaultian approach provides a new direction for interfaith dialogue in the modern world and leads to an ethical rather than a nihilistic position while fostering a non unitary theology of religious pluralism and an open textured process of self transformation the author s original and imaginative application and expansion of foucault s concept of the more from the archaeology of knowledge 1969 makes important and original contributions to academic work on foucault and contemporary theology

in this updated version of a contemporary classic of discourse research reiner keller develops the theoretical and methodological foundations of the sociology of knowledge approach to discourse skad translated from the original german into english for the first time this book brings together two previously unconnected domains of knowledge analysis in social

science the rich traditions of sociology of knowledge and symbolic interactionism on one hand and the works of discourse studies especially in relation to Michel Foucault on the other it presents a critical discussion of key developments in sociology of knowledge symbolic interactionist and related interpretive approaches explains the communicational turn of recent work in the field and examines how traditions within sociology of knowledge shifted focus or converged over time following this the book discusses the development of discourse theory and discourse analysis since the 1960s including critical discourse analysis hegemony analysis or cultural studies approaches embarking from a profound reconstruction of Michel Foucault's work the book then sets its own distinctive course by integrating major elements of Foucault's perspective with the sociology of knowledge along this path Reiner Keller establishes the heuristics and methodology for a sociology of knowledge approach to discourse providing a comprehensive research programme for the study of social relations of knowledge and politics of knowledge since its first publication in 2005 skad has informed a multitude of studies worldwide and across several academic disciplines today it can be considered as one of the major perspectives in discourse research in social science and beyond

a new and important study of the relationship between two key thinkers of the twentieth century

Michel Foucault is rarely viewed as a philosopher of technology yet academics and students routinely refer to his terms technologies of power governmental technologies and technologies of the self this book is a response to the contradiction between the paucity of research into Foucault's technological thought and the abundance of technological vocabulary and metaphors in his own writings as well as in the commentary literature it provides the most extensive examination of the role of technology in Foucault's work so far Villadsen argues that technology serves neither as an object of Foucault's analysis nor as a convenient metaphor for making arguments but as rather integral to his thinking and writing as the book's title Foucault's technologies indicates it explores not Foucault and modern technology understood as technical devices like

television smartphones or industrial machines but rather foucault s approach to the theme of technology and his use of technological terms the book provides an extensive exploration of foucault s technological thought arguing that he offers a distinct framework that confronts commonsensical understanding and other scientific approaches to technology the reader will travel a route paved with discussions of how foucault s work intersects with that of other key thinkers particularly heidegger althusser nietzsche and deleuze while presenting efforts in intellectual history the book ultimately focusses on the analytical implications for users showing how researchers can benefit from foucault s technological approach as such the book offers an analytical framework effective for the study of problems in present day welfare states and the emergent world of data capitalism

this book examines the birth of the european individual as a juridical problem focusing on legal case dossiers from the european court of justice as an electrifying laboratory for the study of law and society foucault s story of the modern subject constitutes the book s main theoretical inspiration as it considers the encounter between legal and other practices within a more general field of juridical power a network of active relations between different social spheres through the analysis of delinquent individuals each expelled from one of the member states the raw material for constructing the idea of the european individual is uncovered the european individual it is argued emerged out of the intersection of regimes of law security and economy and its practices of knowledge power birth of the european individual law security economy will be of interest to those studying the individual in law as well as anyone considering the relationships between power and the individual

this book brings into conversation geographically diverse theorists to question the meaning purpose and place of conceptual borders in philosophy it shows how contemporary theory is constituted by a dynamic practice in which the boundaries created to define it are simultaneously overcome in their establishment philosophy has often taken itself to be distinguished

from and superior to alternative ways of thinking to do so philosophical thinking has found itself rigidly affirming the need to think within borders to obtain conceptual clarity and certainty and or secure its own independent existence the chapters in this volume call into question the need to retreat behind demarcated boundaries that mark the domain of philosophy proper to instead offer a performative account of how philosophy can creatively work across geographical cultural linguistic borders without foreclosing that analysis conceptually in so doing the contributors tackle issues including the historical establishment of philosophical borders the metaphysics of philosophical borders the relationship between western and non western thinking the ethics of transgressing borders and the political implications of western rationality on and for non western societies philosophy across borders will therefore be of interest to scholars and advanced students working in philosophy aesthetics critical theory comparative philosophy cultural studies feminist theory history of ideas political theory and postcolonial studies

a fabulous journey through thirty years of political and intellectual ferment will reorient our reading of foucault s major works didier eribon the essential works of michel foucault offers the definitive collection of his articles interviews and seminars from across thirty years of his extraordinary career this first volume ethics contains the summaries of foucault s renowned courses at the college de france as well as key writings and candid interviews on ethical matters from the role of the intellectual and philosopher in society to friendship sexuality and the care of the self and others edited by paul rabinow translated by robert hurley and others
