effectiveness efficiency excellence these words and concepts permeate current

literature courses and discussions they are defined in nearly as many different ways as the number of people who write and talk about them for practical purposes the definitions seem to boil down to these effectiveness doing the right things efficiency doing things right excellence efficiently meeting effective goals both short term and long range we believe that this book can help you improve the effectiveness efficiency and excellence of your system for managing loss control and for quality production and cost control in essence it can help improve your management system improved quality production and cost control go hand in hand with improved loss control and they all depend on how the system is managed the idea that excellence in safety and production go hand in hand is not new as early as 1928 the american engineering council based on an engineering and statistical study demonstrated that an organization with decreasing injury rates is eleven times more likely to show increased production than an unsafe one we believe that the book's concepts practices techniques and tools reflect what leading organizations around the free world have done and are doing to get their results spanning more than three decades we have had the good fortune to work with tens of thousands of leaders in hundreds of organizations to distill the contents of this book the ideas and applications are tried tested and proven put them to work and they will work for you

over the last three decades the process industries have grown very rapidly with corresponding increases in the quantities of hazardous materials in process storage or transport plants have become larger and are often situated in or close to densely populated areas increased hazard of loss of life or property is continually highlighted with incidents such as flixborough bhopal chernobyl three mile island the phillips 66 incident and piper alpha to name but a few the field of loss prevention is and continues to be of supreme importance to countless companies municipalities and governments around the world because of the trend for processing plants to become larger and often be situated in or close to densely populated areas thus increasing the hazard of loss of life or property this book is a detailed guidebook to defending against these and many other hazards it could without exaggeration be referred to as the bible for the process industries this is the standard reference
