reasons why first argues that what philosophers are really after or at least should be after when they seek a theory of explanation is a theory of answers to why questions it then advances a thesis about what form a theory of answers to why questions should take a theory of answers to why questions should say what it takes for one fact to be a reason why another fact obtains the book's main thesis then is a theory of reasons why every reason why some event happened is either a cause or a ground of that event challenging this thesis are many examples philosophers have thought they have found of non-causal explanations reasons why uses two ideas to show that these examples are not counterexamples to the theory it defends first is the idea that not every part of a good response to a why question is part of an answer to that why question second is the idea that not every reason why something is a reason why an event happened is itself a reason why that event happened in the book's

final chapter its theory of reasons why is extended to cover teleological answers to why questions and answers to why questions that give an agent's reason for acting

this handbook provides both an overview of state of the art scholarship in philosophy of science as well as a guide to new directions in the discipline section i contains broad overviews of the main lines of research and the state of established knowledge in six principal areas of the discipline including computational physical biological psychological and social sciences as well as general philosophy of science section ii covers what are considered to be the traditional topics in the philosophy of science such as causation probability models ethics and values and explanation section iii identifies new areas of investigation that show promise of becoming important areas of research including the philosophy of astronomy and astrophysics data complexity theory neuroscience simulations post kuhnian philosophy post empiricist epistemology and emergence most chapters are accessible to scientifically educated non philosophers as well as to professional philosophers and the contributors all leading researchers in their field bring diverse perspectives from the north american european and australasian research communities this volume is an essential resource for scholars and students
