people approaching retirement or already retired can significantly improve their financial situation by making smart decisions and avoiding financial mistakes this comprehensive guide tells how and shows what to expect what to select and what to reject written in jargon free language by well known personal finance expert jonathan pond it clearly explains how to determine how much money one will need to live comfortably in retirement and accumulate that sum or more from personal savings social security and an ira keogh 401 k or pension plan it s an indispensable road map to financial independence and peace of mind and how to avoid the numerous potholes along the way

master s thesis from the year 2010 in the subject business economics investment and finance grade 2 0 reutlingen university business administration language english abstract the global financial and economic crises resulted for many corporations in a downgraded credit rating within the last 2 to 3 years even a large percentage of them defaulted on their credit obligations due to inherent operational factors the importance of credit ratings will play an even more central role under the currently discussed new basel capital accord basel iii standard poor s 2010 basel iii for global banks the purpose of this research is to explore the relationship between long term credit ratings and selected financial ratios that can be derived by public information such information can be very valuable for companies in order to have a slight control over their credit rating obtained by rating agencies as well as in negotiations with banks and other outside creditors the research design is based on three automotive manufacturers and involves their credit rating over the last decade the data for the financial ratios was collected from respective financial statements the study is based on a correlation and multiple regression analysis using the minitab minitab data analysis software pennsylvania usa software as a statistical platform a step wise approach determined the regression equation with the highest significance the equations were used to detect those variables that have the strongest impact on the credit rating the results for automotive companies with a solid statistical data set are surprisingly high in significance with an adjusted coefficient of determination of over 90 overall it is not feasible to mention which one of the seventeen financial ratios explains the variation in credit rating most reliable because such a statement depends always on the individual company for example to explain the changes in the rating for the ford motor

this casebook provides real world applications addressing the financial decisions that manager s face at entrepreneurial and mid size companies
