includes regular and extra sessions

the history of pregnancy testing and how it transformed from an esoteric laboratory tool to a commonplace of everyday life pregnancy testing has never been easier waiting on one side or the other of the bathroom door for a positive or negative result has become a modern ritual and rite of passage today the ubiquitous home pregnancy test is implicated in personal decisions and public debates about all aspects of reproduction from miscarriage and abortion to the biological clock and ivf yet only three generations ago women typically waited not minutes but months to find out whether they were pregnant a woman's right to know tells for the first time the story of pregnancy testing one of the most significant and least studied technologies of reproduction focusing on britain from around 1900 to the present day jesse olszynko gryn shows how demand shifted from doctors to women and then goes further to explain the remarkable transformation of pregnancy testing from an obscure laboratory service to an easily accessible though fraught tool for every woman lastly the book reflects on resources the past might contain for the present and future of sexual and reproductive health solidly researched and compellingly argued olszynko gryn demonstrates that the rise of pregnancy testing has had significant and not always expected impact and has led to changes in the ways in which we conceive of pregnancy itself

contemporary dutch policy and legislation facilitate the use of high quality accessible and affordable assisted reproductive technologies arts to all citizens in need of them while at the same time setting some strict boundaries on their use in daily clinical practices through the ethnographic study of a single clinic in this national context patient centred ivf examines how this particular form of medicine aiming to empower its patients co shapes the experiences

views and decisions of those using these technologies gerrits contends that to understand the use of reproductive technologies in practice and the complexity of processes of medicalization we need to go beyond easy assumptions about the hegemony of biomedicine and the expected impact of patient centredness
