this encyclopedia is composed of an eight volume set that provides an overview of the field of
 environmental analysis the contents are divided into major content areas including air pollution
 control environmental law and environmental sampling the volumes are organized alphabetically
 with each article signed by the author s the individual articles begin with a summary of the topic
 heading and then divide the text into subtopics indicated by boldface headings the articles are
 written clearly however the authors assume a basic knowledge of chemistry and math on the
 part of the reader for example the acid mine drainage article refers to the arrhenius equation
 but does not clarify this statement in the text each article contains graphs as well as pictures to
 illustrate points made in the text the articles are long and provide a detailed explanation of each
 topic the authors also provide a bibliography at the end of each article special features of the
 encyclopedia include a list of contributors a table of conversion factors and a list of
 abbreviations and acronyms the preface outlines the general contents of the encyclopedia the
 preface also includes sections that suggest the target audience and recommended usages for
 the set the final volume of the set contains an alphabetic index to the topics contained in the
 volumes

includes section reviews

the report details the progress made by belarus in the management of its environment since the country was first reviewed in 1997 among the issues receiving special attention during the review were compliance and enforcement mechanisms information public participation and education and environmental management in industry energy transport agriculture and ecotourism
