the herbai medicine industry is growing at an astounding rate trade group estimates suggest that total sales exceeded 4 billion dollars in 1999 herbai remedies are for sale not just in health food stores but in supermar kets drug stores and even discount warehouses along with the proliferation in sales has come a proliferation of information sources not all of the sources are equally reliable or even intelligible traditional herbalists classify thistle and mugwort as cholagogues substances used to make the gallbladder contract and release bile medical school graduates are unlikely to have ever heard the term or even accept the notion that most right sided abdominal pain is a result of diminished bile flow heroin and cocaine may not be the only drugs to come from plants but a practicing physician or toxicologist might be forgiven for thinking so in 1998 1264 papers were published about cocaine and only 17 about kava kava an abused herb that is not without toxic side effects unfortunately the majority of the papers about kava kava were published in journals not found in ordinary hospital libraries in recognition of this fact and of the obvious need for a reliable reference work on herbai toxicology the toxicology and clinical pharmacology of herbal products was an early addition to our new series in forensic science and medicine it is very badly needed
