this book presents a research thesis of a large scale study conducted with over 50 large organizations in 7 countries with 80 business leaders to understand how businesses speed up the proficiency of their employees to meet business challenges the book describes a start to end research study that explored the concept of accelerated proficiency of employees in organizations the book is organized into five chapters the book introduces the concept of accelerated proficiency in a business context in light of reviews of four decades of classic studies the research methodology to identify sources recruit participants and the mechanism to collect as well as analyze data have been explained in detail the book reveals six business practices implemented by organizations across the board that seem to make a major impact in shortening the time to proficiency of employees important observations and findings have been discussed as implications in regards to how organizations orchestrated six business practices as an input output feedback system to reduce the time to proficiency of the workforce the book briefly explains how these six practices were implemented through a set of twenty four strategies in various contexts the concepts and findings discussed in this book contribute significantly to the body of knowledge on accelerated proficiency in particular the conceptual model and the framework developed in this study can be implemented across a range of contexts business sectors job types and settings to reduce the time to proficiency of the workforce

this book constitutes the refereed proceedings of the 2nd international conference on intelligent technology for educational applications itea 2025 held in bangkok thailand during may19 21 2025 the 32 full papers included in this book were carefully reviewed and selected from 88 submissions the papers were organized in topical sections as follows ai driven personalized learning adaptive systems intelligent tools for language learning translation data analytics automation in educational management immersive technologies in education innovative pedagogical approaches multimedia integration

translation study programs have always been torn between the expectations placed on them to provide students with a comprehensive education at an academic level but at the same time to prepare them for the demands of the professional translation market there is furthermore an ongoing debate about a supposed gap between translation theory and practice several often opposing claims have been put forward concerning the usefulness of theory to professionals and students and how and when to best implement theoretical courses in translation curricula the aim of this book is to provide an overview of the different opinions and expectations that have been put forward in the literature and to test some of these claims empirically on student subjects who have been trained with either a practical or a theoretical focus on translation it thus gives insights into the role of both theoretical and practical aspects in translator training and the ways in which each of them can contribute to the development of translation competence

this book constitutes the refereed proceedings of the 16th international symposium on computer music multidisciplinary research cmmr 2023 held in tokyo japan during november 13 17 2023 the 37 full papers included in this book were carefully reviewed and selected from 120 submissions they were organized in topical sections as follows artificial intelligence cognitive science and skill science for sound and music music and sound generation emerging approaches and diverse applications computational research on music evolution computational musicology music
