excerpt from the romance of modern chemistry a description in non technical language of the diverse and wonderful ways in which chemical forces are at work and of their manifold application in modern life in the present volume an attempt has been made to deal with this aspect of the subject and the points of view adopted are different from those of the ordinary text book the author ventures to think that those readers who have no technical knowledge may be convinced that radium and other things which figure so largely in the newspapers are by no means the only scientific matters of thrilling interest and perhaps even readers who are already familiar with the elements of the science may be helped to see afresh the many unsuspected and marvellous ways in which chemical forces are at work beneath our very eyes about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
