first published in 1992 this book collects together the papers
presented at the international symposium on design review which

was held to address the growing tendency of local governments to institute programs of aesthetic control the editor argues that the widespread adoption of design review processes in the years preceding the conference necessitated thoroughgoing professional criticism and a number of areas of debate are identified and addressed in the subsequent papers are the difficulties experienced by planners community activists and architects with the process due to its relative youth or inherent flaws in the entire concept how should mechanical problems like time and expense the ease with which the process can be manipulated and general inefficiencies in the system be resolved more intricate problems are also addressed such as who has the power to judge the aesthetic quality of a building whether design review infringes on the rights of the individual especially under the first amendment whether the design review process is fair and the difficulty for the reviewer of deciding what is right and what is wrong having taken into account factors that can be highly subjective or contradict more practical concerns

that the topic of design review is somehow true my biases are clear from the start i am among those who believe that despite all signals to the contrary the physical structure of our environment agree on beyond this however i suspect prospects of consensus are dim differing opinions must be managed and that controlling it is on the subject likely range from those desiring the key to the amelioration of numerous problems control to those desiring freedom say one camp confronting society today i believe that design our physical and natural environments are going can solve a host of problems and that the design to hell in a hand basket says the other design of the physical environment does influence be review boards are only as good as their members behavior more often than not their interventions produce clearly this is a perspective that encompasses mediocre architecture more than one building at a time and demands as a town planner and architect i am sympathetic that each building understand its place in a larger aesthetic to the full range of sentiment perhaps a context the city indeed anyone proposing discussion of these two concepts control and physical solutions to urban problems is designing freedom and their differences would now be or as may seem more often the case destroying useful but let me instead suggest that both position the city

design is ubiquitous speaking across disciplines it is a way of thinking that involves dealing with complex open ended and

contextualized problems that embody the ambiguities and contradictions in everyday life it has become a part of pre college education standards is integral to how college prepares students for the future and is playing a lead role in shaping a global innovation imperative efforts to advance design thinking learning and teaching have been the focus of the design thinking research symposium dtrs series a unique feature of this series is a shared dataset in which leading design researchers globally are invited to apply their specific expertise to the dataset and bring their disciplinary interests in conversation with each other to bring together multiple facets of design thinking and catalyze new ways for teaching design thinking analyzing design review conversations is organized around this shared dataset of conversations between those who give and those who receive feedback guidance or critique during a design review event design review conversations are a common and prevalent practice for helping designers develop design thinking expertise although the structure and content of these reviews vary significantly they make the design thinking of design coaches instructors experts peers and community and industry stakeholders and design students visible during a design review coaches notice problematic and promising aspects of a designer s work in this way design students are supported in revisiting and critically evaluating their design rationales and making sense of a design review experience in ways that allow them to construct their design thinking repertoire and evolving design identity

this book provides an original contribution to the planning and design literature not only does it provide a fresh and finely grained examination of the daily challenges and opportunities of design review practice but it does so in an ethnographically compelling way through extensive references that convey and show what a distanced researcher could never adequately summarize and paraphrase architects urban designers and developers will learn about how they might work with design reviewers on the basis of the four significant roles that a design review staff plays frequently in the design review process faculty and students in architecture urban design and urban planning will learn about design governance design regulations design culture participants processes and micropolitics in design and design reviews there are possibly tens of thousands of design review boards in the united states that review proposals for building designs and site designs submitted by practitioners in architecture landscape architecture urban design urban planning and urban development given this considerable professional context the target audience

of this book includes design reviewers practitioners scholars educators and students in the fields of architecture urban design landscape architecture urban planning and urban development
