this book introduces the reader to basic issues related to the phenomenon of american cinema it looks at american film history from the 1890s through the spring of 2020 but it does not always explore this history in a purely chronological way in fact it is not strictly speaking a history rather it is a cultural history which focuses more on topics and issues than on what happened when it begins with a profile of

classical hollywood cinema as a unique economic industrial aesthetic and cultural institution it considers the experience of moviegoing the nature of hollywood storytelling and the roles played by the studio system the star system and film genres in the creation of a body of work that functions not only as entertainment but as a portrait of the relationship between an american national identity and an industrialized mass culture that has slowly evolved over the past century this book assumes that the reader has little or no formal training in film history theory or aesthetics it presents fairly basic concepts in such a way as to encourage discussion not so much of individual films but of films in general for this reason the book concentrates on large groupings of films on genres topics and periods of film history this textbook differs from the more traditional histories of the cinema for certain specific and important reasons over the past fifty years the field of film study has undergone a tremendous transformation this change has been spearheaded by the work of a new generation of scholars who challenge the traditional way in which film history has been written and taught introduction to film courses that fifty years ago taught film as art drew heavily upon the approaches of new criticism contemporary film courses now teach film not only as art but also as film and they attempt to situate film as an art form within a larger industrial economic social and cultural context they rely heavily on cultural studies new historicism psychoanalysis and other contemporary critical disciplines film history texts have changed over the years as well in the past histories consisted of simple chronological accounts of who did what and what happened when and of the stories of great men sic and their achievements and of straightforward accounts of the influence of technology and economics on the course of a history that unfolds in a linear fashion up to the present more recently film scholars have begun to rewrite these traditional histories creating what thomas Elsaesser refers to as the new film history at its best this history is driven by a sophisticated theoretically informed revisionism it simply refuses to accept the easy answers to basic historical questions that had been offered up by past historians with the initial publication of american cinema american culture in 1994 the methods and discoveries of the new film history were applied to an introductory level text surveying the history of the american cinema

although films rarely act as mirror reflections of everyday reality they are nevertheless powerful cultural expressions of the dreams and desires of the american public this work provides a complete post world war ii survey of american cinema and its often complex and contradictory values

this is an original investigation of how movies have reflected and helped to shape the values of a generation from all the president s men to wall street us films of the 1970s and 80s were a kaleidoscope of shifting values and contrasting moral viewpoints knowing that movies mirror the way we think we are or would like to be o brien focuses on the key values or their absence found in films from this period in order to see more clearly what americans really cherished in life and how these values have evolved or changed comprehensive and thought provoking this book addresses how and why movies glamorized and portrayed certain professions the changing role of women the targeting of religion for satire the addressing of environmental issues and film s representation of and engagement with history

now thoroughly revised and updated the book discusses recent breakthroughs in media technology including such exciting advances as video discs and cassettes two way television satellites cable and much more

billy wilder american film realist closely examines a selection of wilder s films from 1941 through 1981 these films show wilder at his best as a hardworking hollywood craftsman and an astute commentator on the american century book jacket

while the myth of a classless america endures in the american dream the very stratification that it denies unfairly affects the majority of americans study after study shows that it s increasingly difficult for working class people to achieve upward mobility in the us so how does the american dream continue to thrive j emmett winn shows us that the american dream s continued glorification in contemporary hollywood cinema should not be ignored the book explicates three major themes surrounding the american dream in contemporary hollywood cinema and relates those findings to the united states social and cultural changes in the last 25 years through his thoughtful analysis of films as diverse as working girl titanic pretty woman flashdance the firm good will hunting saturday night fever wall street and many others winn shows that contemporary hollywood is very much in the business of keeping the dream alive bloomsbury publishing

hollywood has a growing fascination with america s past this book offers an analysis of how and why contemporary hollywood films have sought to mediate american history it considers whether or how far

contemporary films have begun to unravel the unifying myths of earlier films and periods
