this book describes how the violent dimension of intergroup relations can be better understood if the interplay between psychological and social developmental factors is taken into account ten unique innovative and original chapters by international scholars of social and developmental psychology address the way how social reality is constructed as a hierarchical order and how social norms beliefs and cognitive behavioral patterns are learned shared and repeatedly processed on how to uphold or challenge this social order the volume covers diverse issues such as the effects or lack thereof of power and violent video games on people s thinking and behavior the acquisition of social norms and attitudes during childhood minorities identity management strategies the role of mothers educational beliefs and the impact of ideologies this volume is inspired by the oeuvre of maria benedicta monteiro emphasizing the psychogenetic and sociogenic diacronies that are too often neglected by the predominantly synchronic paradigm of social psychology it is therefore an indispensable reading for researchers and advanced students in social community and developmental psychology for scientifically interested practitioners working with families school contexts or intergroup conflict and for

everyone interested in the expanding field of the social developmental approaches to attitudes and behaviour

the objectives of the volume are to direct the field's attention to the unique value of studying interactions between members of different groups and to offer the most up to date summaries of prominent and cutting edge scholarship on this topic written by leading scholars in the field a central theme of the volume is that improvement in intergroup relationships will only be possible if social scientists simultaneously take into account both the attitudes beliefs emotions and actions of the different groups that shape the nature of intergroup relations understanding how members of different groups interact is critical beyond the value of understanding how majority groups behave and how minority groups respond in isolation indeed as the book exemplifies groups interpret their interaction differently experiencing different social realities approach interactions with different goals and engage each other with different and often non compatible means or strategies these different realities goals and strategies can produce misunderstanding suspicion and conflict even when initial intentions are positive and cooperative the book will be of interest to professionals and students in social psychology sociology social work education political science and conflict management as well as scholars students and practitioners interested in anti bias education and prejudice reduction techniques and strategies
