chapter discussion question teachers are encouraged to participate with the student as they complete the discussion questions the purpose of the chapter purpose section is to introduce the chapter to the student the discussion questions are meant to be thought provoking the student may not know the answers but should answer with their thoughts ideas and knowledge of the subject using sound reasoning and logic they should study the answers and compare them with their own thoughts we recommend the teacher discuss the questions the student s answers and the correct answers with the student this section should not be used for grading purposes dvd each dvd is watched in its entirety to familiarize the student with each book in the course they will watch it again as a summary as they complete each book students may also use the dvd for review as needed as they complete each chapter of the course chapter worksheets the worksheets are foundational to helping the student learn the material and come to a deeper understanding of the concepts presented often the student will compare what we should find in the fossil record and in living creatures if evolution were true with what we actually find this comparison clearly shows evolution is an empty theory simply based on the evidence god s word can be trusted and displayed both in the

fossil record and in living creatures tests and exams there is a test for each chapter sectional exams and a comprehensive final exam for each book

the introductory statistics course presents serious pedagogical problems to the instructor for the great majority of students the course represents the only formal contact with statistical thinking that he or she will have in college students come from many different fields of study and a large number suffer from math anxiety thus an instructor who is willing to settle for some limited objectives will have a much better chance of success than an instructor who aims for a broad exposure to statistics many statisticians agree that the primary objective of the introductory statistics course is to introduce students to variability and uncertainty and how to cope with them when drawing inferences from observed data addi tionally the introductory course should enable students to handle a limited number of useful statistical techniques the present text which is the successor to the author s introduction to statistics a nonparametric approach houghton mifflin company boston 1976 tries to meet these objectives by introducing the student to the ba sic ideas of estimation and hypothesis testing early in the course after a rather brief introduction to data organization and some simple ideas about probability estimation and hypothesis testing are discussed in terms of the two sample problem which is both conceptually simpler and more realistic than the one sample problem that customarily serves as the basis for the discussion of statistical inference
