the fact that one would contemplate publication of a book such as this indicates both the maturity and the growth of activity that have taken place in the field of psycholinguistics over the past few decades more over the fact that psycholinguists and or scholars of the history of ideas are interested in the history of their subject clearly demonstrates that much has been accomplished and the time is indeed ripe for the reassessment of whence we have come in addition perhaps this interest in our historical past suggests that psycholinguistics is at a critical stage in its development there are many scholars who believe that this critical stage manifests itself primarily in a search for a new paradigm it would seem only reasonable to suggest that when members of a profession are searching for something new more than likely they will take time to reflect on the past in the hope that it will facilitate the fulfillment of their quest this book as such reflects a wide ranging search for historical roots over a millennium of research in the psychology of language and thought furthermore it also reflects an attempt to open the context by introducing the broader perspectives of the history of ideas and the history of science together with their reassessment of the method of science motivated from within psychology itself
