marilyn iinger tallman and teresa m cooney s families in context introduces

foundational ideas and concepts about families and applies them to issues and events relevant to today's college student population. This comprehensive but concise paperback, written in clear, student-friendly language, fills the following needs not being met by existing texts: the text is structured consistently, featuring an overarching framework that combines family systems theory and ecological systems theory; this approach bridges both micro and macro perspectives on families; each chapter places families squarely within their respective environments, their neighborhood, community, and national context, and provides conceptual linkages between the different aspects of family life; diversity is integrated into each chapter; the text's emphasis on social context allows the exploration of families in at least three ways: 1) how individuals live out their intimate experiences within families and communities; 2) the impact of family groups on their neighborhoods and communities, and vice versa; and 3) the ways in which the larger social contexts influence families within different class levels and racial groups. The book's brevity and reasonable price allow ample time for instructors to easily supplement their courses with additional materials. Each chapter opens with a "Did You Know" box detailing ideas related to chapter content and preparing students for the chapter's topics. Similarly, a box entitled "Things to Think About" offers questions, definitions, or comments intended to provoke students' critical thinking. The text provides a hands-on approach by featuring critical thinking activities at the end of each chapter, enabling students to apply learned concepts and principles. Finally, additional readings and a glossary of relevant theoretical concepts are provided.

Family life is exciting and interesting. Many of us want to know how to make our own families stronger and how to assist other families as they struggle with life's difficulties. Often, the lives of families are at the center of national news, political campaigns, movies, and heated congressional debates. We care about how families raise their children, spend money, decide where to live, and how they contribute to the economy. Much of the discussion about family life focuses on who people choose to marry, how many children they decide to have, and whether or not they divorce or stay married or get remarried. Examining the family, this text's basic premise is that we can do a better job of understanding families when we know more about the inner life of families. This book is an attempt to gather what is known about what goes on behind closed doors in families. The intent is to introduce the reader to family processes, strategies, and daily sequences of behavior used by family members to achieve goals. Some time is spent discussing who families are, but the bulk of this text is concerned with what families do: that is, how does their communication style help or hinder their efforts to achieve what they believe to be important? In addition, the book addresses how families make decisions, allocate resources, design and execute rituals, and cope with stress and crises.

Family Connections is a major new introduction to the study of the family, written by one of the leading scholars in the field. Morgan shows that the study of the family is not a peripheral concern of sociology but rather lies at the heart of sociological theory and research. Family Connections takes the reader through the established debates such as

the relation between family life and the world of work and employment the impact of class and stratification on the family and the relevance of gender morgan then examines some newer areas of social inquiry including the sociology of the body time and space food and the home the relevance of the family to more general topics of sociological theory such as postmodernity citizenship consumption and risk is discussed the emphasis throughout is on family relationships as processes which are fluid complex and open to change
