responsibility participation and choice are key policy framings of active citizenship summoning the citizen to take on new roles in welfare state reform this volume traces the emergence of new discourses and the ways in which they take up and rework struggles of social movements for greater independence power and control it explores the changing cultural and political inflections of active citizenship in germany finland norway the netherlands france italy and the uk with ethnographic research complementing policy analysis the editors then look across the volume to assess some of the tensions and contradictions arising in the turn to active citizenship two final chapters address the reworking of citizen professional relationships and the remaking of public private and personal responsibilities with a particular focus on the contribution of feminist research and theory

recently there has been a growing interest not only in existentialism but also in existential questions as well as key figures in existential thinking yet despite this renewed interest a systematic reconsideration of kierkegaard s existential approach is missing this anthology is the first in a series of three that will attempt to fill this lacuna the 13 chapters of the first anthology deal with various aspects of kierkegaard s existential approach its reception will be examined in the works of influential philosophers such as heidegger gadamer and habermas as well as in lesser known philosophers from the interwar period such as jean wahl lev shestov and benjamin fondane other chapters reconsider central notions such as anxiety existence

imagination and despair finally some chapters deal with kierkegaard s relevance for central issues in contemporary philosophy including naturalism self constitution and bioethics this book is of relevance not only to researchers working in kierkegaard studies but to anyone with an interest in existentialism and existential thinking

welfare to work programmes aim to assist the long term unemployed in finding work increasing labour market flexibility eliminating dependency and tackling social exclusion they have been implemented in many western countries this book focuses on an important and novel feature of these programmes they replace the rights based entitlements that have characterized the welfare state for decades with conditional rights dependent on the fulfilment of obligations conditions are attached to the benefits received this new type of social contract between the claimant and the state carries with it a new construction of the relationship between rights and responsibilities and a new interpretation of citizenship paz fuchs examines the theoretical underpinnings of welfare to work programmes incorporating a comparative analysis of the uk and usa where the ideal of social citizenship is being curtailed through welfare reforms he argues that when the rhetoric of the social contract is used to imply a continuous contract between citizens and the state a vast array of conditions on welfare can be legitimated including workfare the obligation to accept any job offer and moral and social preconditions that are based on a vague notion of reciprocity paz fuchs argues by contrast that conditional welfare undermines civil rights such as the right to privacy and family life by requiring welfare claimants to change their behaviour he contends that strengthening welfare rights and relaxing preconditions on entitlement would better serve the objectives that welfare to work programmes are supposed to advance

americans are fixated on the idea of choice our political theory is based on the consent of the governed our legal system is built upon the argument that people freely make choices and bear responsibility for them and what slogan could better express the heart of our consumer culture than have it your way in this provocative book kent greenfield poses unsettling questions about the choices we make what if they are more constrained and limited than we like to think if we have less free will than we realize what are the implications for us as individuals and for our society to uncover the answers greenfield taps into scholarship on topics ranging from brain science to economics political theory to sociology his discoveries told through an entertaining array of news events personal anecdotes crime stories and legal decisions confirm that many factors conscious and unconscious limit our free will worse by failing to perceive them we leave ourselves open to manipulation but greenfield offers useful suggestions to help us become better decision makers as individuals and to ensure that in our laws and public policy we acknowledge the complexity of choice

what should i do how should i deal with this how should i behave how should i act we ask ourselves daily but this is only the first part of the sentence while the full sentence is what should i do to achieve such and such for example to complete an assigned task to do well before my boss or a client to be pleased with myself to carry out my plans to make money in the stock market to pass an exam to complete an application etc these and similar questions that people ask consciously or not openly or not are decisions what skills must we master especially when there is a need to make not only elementary decisions but also decisions that affect the existence health and even lives of people first laszlo zsolnai writes that we should acquire the skill of gaining knowledge only then will we stand a chance of reacting to things that are improbable today but could become a fact tomorrow also essential is the skill of designing i e preparing actions conceptually in order to make decisions before irreversible changes occur finally it is essential to master the skill of multidimensional judgment within the space defined by effectiveness efficiency and ethics this is zsolnai s attempt to build a model of making ethical decisions both effectively and efficiently therefore the model is much

broader than purely an analytical framework would be it must tell us how to act rather than limit us to reflection on actions already performed it must combine decision and praxiological analysis of human conduct the proposed model enlarges the scope of the debate and suggests new avenues of both rational and responsible decision making this is an original statement of the crossover of policy and morality

this introduction just aims to be a fast foreword to the special topic now turned into an e book the editorial decision making experiments under a philosophical analysis human choice as a challenge for neuroscience alongside with my opinion article neurophilosophical considerations on decision making pushing up the frontiers without disregarding their foundations play the real role of considering in more details the articles and the whole purpose of this e book what i must highlight in this foreword is that our intention with such a project was to deepen into the very foundations of our current paradigms in decision neuroscience and to philosophically moot its foundations and repercussions normal science a term coined by philosopher thomas kuhn works under a research consensus among a scientific community a shared paradigm consolidated methods widespread convictions pragmatically winning formulas must be kept although not at any cost what differentiates a gifted and revolutionary scientist from a more bureaucratic colleague is the capacity and willingness of constantly reevaluating depurating and refining his her own paradigm that is best strategy to avoid that a paradigm itself would gradually come under challenge in my view some achievements in this sense were brought about in our project the e book will be inspiring and informative for both neuroscientists that are concerned with the very foundations of their works and for philosophers that are not blind to empirical evidence kant once said thoughts without content are empty intuitions without concepts are blind paraphrasing kant we could say philosophy without science is empty science without philosophy is blind

discusses the nature and limits of the legal and social enforcement of moral norms

this guide provides teachers with theory research and practical suggestions for motivating students to engage in learning activities
