deeper learning has been defined as the skills and knowledge that students must possess to succeed in 21st century jobs and civic life. William and Flora Hewlett Foundation 2013. *Assessing Deeper Learning: Developing, Implementing, and Scoring Performance Tasks* examines the role of performance assessment to facilitate student attainment of the core competencies of deeper learning. The book details a journey that a large school district undertook to create a system of performance tasks designed to assess students' proficiency in critical thinking, problem solving, and effective communication. Chapters devoted to the development and implementation of the district's high quality performance tasks and rubrics highlight successes and lessons learned during the journey. Additional chapters focus on such topics as types of performance assessments, instructional methods that promote student engagement, and deeper learning policy and how teacher leaders can drive this innovation to serve the teaching, learning, assessment, and accountability needs of schools. *Assessing Deeper Learning: Developing, Implementing, and Scoring Performance Tasks* was written for teachers, administrators, superintendents, and policy makers to better understand the challenges and opportunities afforded by using performance assessment to promote deeper learning.

In response to race to the top, schools nationwide are rapidly overhauling their teacher evaluation processes. Often forced to develop and implement these programs without adequate extra institutional support or relevant experience, already taxed administrators need accessible and practical resources. *Improving Teaching Through Observation and Feedback* brings cutting edge research and years of practical experience directly to those who need them. In five concise chapters, Thomas Good and Alyson Lavigne briefly outline the history of RTTT and then move quickly and authoritatively to a discussion of best practices. This book is a perfect resource for administrators reworking their processes for new evaluation guidelines.

*Guide for Creating a School Science Fair* teaches students how to use the scientific method while creating science projects.

Building a community in the classroom is a way for teachers and students to be freer to learn and to explore ideas. This book is written for novice teachers, be they student teachers, beginning teachers, or interns. I have learned that when students of all ages work together in democratic classroom communities and are supported by teacher and administrative efforts, the classrooms become exciting environments with students and teachers more engaged in meaningful activities.

The role of rubrics in assessing student progress is explained. Information and examples on how to develop rubrics to fit your needs are also provided.

This first edition book offers very current treatment of curriculum issues. Instructional planning and new curriculum standards. The book integrates elements of the major historical, philosophical, and social influences upon past curriculum development. It compares traditional and futurist philosophies and describes the developmental aspects of children and their changing needs and interests within a framework of instructional expectations at specific grade levels. It also teaches the skills of curriculum development and instructional design while a balanced coverage of viewpoints has been attempted. The book is intended to open new avenues by including educational futurism in a curricular model. It contains key chapter concepts, focus questions, a futurist curriculum model, actual units of instruction, and exercises for the reader to try for educators at the elementary and

middle school levels
