this collection of fourteen essays by scholars from canada europe the united kingdom and the united states emerges from a growing interest in the ways postmodern theory can illuminate not just the products and ideas of high culture but also the ins and outs

of everyday life taking the university classroom broadly construed as a site of theoretical investigation this volume helps us to understand troublesome classroom dynamics as well as offering pedagogical strategies for dealing with them it also illuminates current pressures on higher education that find expression in the classroom as a forum for these issues these essays draw upon deleuzian feminist foucauldian and psychoanalytic approaches among others recognizing not only that these approaches are often in conflict but also that collectively they enhance our understanding of the classroom important questions posed here include whether and if so how we can combine a marxist or foucauldian emphasis on the disciplinary and hegemonic practices of educational institutions with a lacanian or barthesian appreciation for the disruptive pleasures and drives that the unconscious produces within and through students teachers and classrooms which theoretical and pedagogical innovations can help teachers and students to get the job done as well as to theorize the job to simultaneously practice education and imagine other forms and ends for education how can theory help us to historicize criticize and re draw the productive but sometimes disabling lines that make the classroom and its subjects a site for lively theoretical debate about these and related pedagogical issues this volume will prove useful for anyone wanting to reinterpret reinvent and reinvigorate the classroom

this book makes the five practices accessible for high school mathematics teachers teachers will see themselves and their classrooms throughout the book high school mathematics departments and teams can use this book as a framework for engaging professional collaboration i am particularly excited that this book situates the five practices as ambitious and equitable practices robert q berry iii nctm president 2018 2020 samuel braley gray professor of mathematics education university of virginia take a deeper dive into understanding the five practices anticipating monitoring selecting sequencing and connecting for facilitating productive mathematical conversations in your high school classrooms and learn to apply them with confidence this follow up to the modern classic 5 practices for orchestrating productive mathematics discussions shows the five practices in action in high school classrooms and empowers teachers to be prepared for and overcome the challenges common to orchestrating math discussions the chapters unpack the five practices and guide teachers to a deeper understanding of how to use each practice effectively in an inquiry oriented classroom this book will help you launch meaningful mathematical discussion through key questions to set learning goals identify high level tasks anticipate student responses and develop targeted assessing and advancing questions that jumpstart productive discussion before class begins video excerpts from real high school classrooms that vividly illustrate the five practices in action and include built in opportunities for you to consider effective ways to monitor students ideas and successful approaches for selecting sequencing and connecting students ideas during instruction pause and consider prompts that help you reflect on an issue and in some cases draw on your own classroom experience prior to reading more about it linking to your own instruction sections help you implement the five practices with confidence in your own instruction the book and companion website provide an array of resources including planning templates sample lesson plans completed monitoring tools and mathematical tasks enhance your fluency in the five practices to bring powerful discussions of mathematical concepts to life in your classroom
