document from the year 2025 in the subject leadership and human resources leadership language english abstract in order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably in order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial

intelligence this new form of leadership is also referred to as leadership 2.0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in hr management in change processes a fundamental distinction must be made between incremental change management and radical change management while incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture this is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts this fuels employees fears and therefore often leads to high staff turnover

this practical guide shows step by step how to use machine learning to carry out actionable decisions that do not discriminate based on numerous human factors including ethnicity and gender the authors examine the many kinds of bias that occur in the field today and provide mitigation strategies that are ready to deploy across a wide range of technologies applications and industries edited by engineering and computing experts mitigating bias in machine learning includes contributions from recognized scholars and professionals working across different artificial intelligence sectors each chapter addresses a different topic and real world case studies are featured throughout that highlight discriminatory machine learning practices and clearly show how they were reduced mitigating bias in machine learning addresses ethical and societal implications of machine learning social media and health information dissemination comparative case study of fairness toolkits bias mitigation in hate speech detection unintended systematic biases in natural language processing combating bias in large language models recognizing bias in medical machine learning and ai models machine learning bias in healthcare achieving systemic equity in socioecological systems community engagement for machine learning
