this book seeks to offer a general interpretation and critique of both methodological and substantive aspects of international theory

this book provides current information about the many recent contributions of social systems theory while some sociologists feel that the systems age ended with functionalism in reality a number of

recent developments have occurred within the field the author makes these developments accessible to sociologists and other non systems scholars and begins a synthesis of the burgeoning systems field and mainstream sociological theory the analysis shows not only that important points of rapprochement exist between systems theory and sociological theory but also that systems theory has in some cases anticipated developments needed in mainstream theory

in zero variable theories dr robert wicklund invites the reader to consider the psychological perspective of the explainer in examining the over simplifications that have become dominant in modern psychology the author points to such factors as competition with other explainers and pressure to offer and promulgate a unique explanation the explainer is characterized as equating theory with simple fixed categories and as defending those categories as one would defend a personal territory fending off competing explainers through mis use of statistical devices the end result is the formulation of theories that neglect the perspectives of those whose behaviors are to be explained and which simultaneously exclude psychological variables
