training in the motor vehicle repair and sales sector in the netherlands was examined in a study that included the following approaches  
review of the sector s structure characteristics  
institutional and social context  
employment practices  
changing conditions and available education and training in depth  
case studies of four auto repair shops and dealerships  
two small one medium sized and one large firm and identification of economic employment and training trends  
it was discovered that in response to stagnation of the dutch motor vehicle sales and repair industry in the 1990s both the dutch government and the industry have increased their commitment to vocational training and inservice courses and have created a training infrastructure that compares favorably with those of other sectors in the dutch economy  
all four businesses studied in depth were managed by individuals who were very involved in training had access to good facilities and opportunities for on the job teaching training and could avail themselves of good external provisions for inservice training  
quality of service was an important element of training philosophy  
training needs were not always analyzed in a very structured way and none of the businesses studied evaluated systematically the costs benefits of training  
contains 20 references and 19 tables  
figures mn

as a result of the international convention for safe containers csc in 1972 the u s coast guard which will be responsible for implementing and monitoring a rational and effective program in the united states when the convention becomes international law has undertaken through this study to investigate the existing levels of safety to humans and property engaged in the multimodal transport of containerized cargo  
a major conclusion is that the excellent safety record heretofore enjoyed by the container industry is continuing throughout the increasing

development of containerization the commercial environment to which containers are exposed is investigated in terms of the sea highway and rail transport modes as well as the various handling modes within and between terminals to determine if damages which are sustained by containers substantially affect their structural integrity on either an immediate or long term basis
