the sunday times bestseller from the creator of the wildly popular xkcd com hilarious and informative answers to important questions you probably never thought to ask millions visit xkcd com each week to read randall munroe s iconic webcomic fans ask him a lot of strange questions how fast can you hit a speed bump driving and live when if ever did the sun go down on the british empire when will facebook contain more profiles of dead people than living how many humans would a t rex rampaging through new york need to eat a day in pursuit of answers munroe runs computer simulations pores over stacks of declassified military research memos solves differential equations and consults nuclear reactor operators his responses are masterpieces of clarity and hilarity complemented by comics they often predict the complete annihilation of humankind or at least a really big explosion

what if one man decided to answer all the unanswerable questions using science the sunday times bestselling author and xkcd creator randall munroe is here to provide the best answers yet to the important questions you probably never thought to ask the millions of people around the world who read and loved what if still have questions and those questions are getting stranger planning to ride a fire pole from the moon back to earth the hardest part is sticking the landing hoping to cool the atmosphere by opening everyone s freezer doors at the same time maybe it s time for a brief introduction to thermodynamics want to know what would happen if you rode a helicopter blade built a billion storey building made a lava lamp out of lava or jumped on a geyser as it erupted okay if you insist welcome back to the mind blowing world of what if unfazed by absurdity randall consults the latest research on everything from swing set physics to airplane catapult design to clearly and concisely answer his readers questions as he consistently demonstrates you can learn a lot from examining how the world might work in very specific extreme circumstances filled with bonkers science boundless curiosity and randall s signature stick figure comics what if 2 is sure to be another instant classic adored by inquisitive readers of all ages

a special 10th anniversary edition of the million copy bestseller what if from the creator of the wildly popular webcomic xkcd revised and annotated with brand new illustrations and answers to important questions you never thought to ask fans of xkcd ask munroe a lot of strange questions what if you tried to

hit a baseball pitched at 90 percent the speed of light how fast can you hit a speed bump while driving and live if there was a robot apocalypse how long would humanity last what if everyone only had one soulmate what would happen if the moon went away in pursuit of answers munroe runs computer simulations pores over stacks of declassified military research memos solves differential equations and consults with nuclear reactor operators his responses are masterpieces of clarity and hilarity complemented by his signature xkcd comics they often predict the complete annihilation of humankind or at least a really big explosion in celebration of 10 years of unusual insight randall munroe has revised his classic blockbuster to ask what if x 10 the result is 10x the adventure of scientific inquiry featuring brand new 2 color annotations and illustrations this special anniversary edition is far more than a book for geeks what if explains the laws of science in operation in a way that every intelligent reader will enjoy and feel much smarter for having read

in the new york times best selling book from the creator of the wildly popular webcomic xkcd randall munroe gives hilarious and informative answers to important questions you probably never thought to ask fans of xkcd ask munroe a lot of strange questions what if you tried to hit a baseball pitched at 90 percent the speed of light how fast can you hit a speed bump while driving and live if there was a robot apocalypse how long would humanity last what if everyone only had one soulmate what would happen if the moon went away in pursuit of answers munroe ran computer simulations pored over stacks of declassified military research memos solved differential equations and consulted with nuclear reactor operators his responses are masterpieces of clarity and hilarity complemented by signature xkcd comics they often predict the complete annihilation of humankind or at least a really big explosion far more than a book for geeks what if explains the laws of science in operation in a way that every intelligent reader will enjoy and feel much smarter for having read

what if a complete summary what if is a book written by randall munroe the same author of the comic xkcd before munroe became a writer he worked as a roboticist at nasa until 2006 when he became a professional web comic artist what if is a collection of more than sixty strange but interesting questions and their even more interesting answers all of these are of these are questions that munroe has been asked by his readers some of them are complicated requiring mathematical calculations and complex science to answer while others are much simpler they all provide information about unusual topics based on unique questions many people may have wondered about out of curiosity but never thought could really be answered this book tackles those strange

mysteries and reveals the answers to nature's toughest questions where else could we possibly learn what would happen if the earth suddenly stopped rotating in this book we will try to summarize the questions and answers in what if in order to provide an introduction to munroe's concepts after the summary section we will analyze the book and there will be a short quiz with answers on the next page i hope that you will like the book just as we did and that after reading this summary you will also decide to read the original book here is a preview of what you will get y a summarized version of the book y you will find the book analyzed to further strengthen your knowledge y fun multiple choice quizzes along with answers to help you learn about the book y get a copy and learn everything about what if

randall munroe is nerd royalty ben goldacre totally brilliant tim harford laugh out loud funny bill gates wonderful neil gaiman an instant 1 new york times bestseller the world's most entertaining and useless self help guide from the brilliant mind behind the wildly popular webcomic xkcd and the million selling what if and thing explainer for any task you might want to do there's a right way a wrong way and a way so monumentally bad that no one would ever try it how to is a guide to the third kind of approach it's full of highly impractical advice for everything from landing a plane to digging a hole how strange science can fix everyday problems new scientist a brilliant book clamber in for a wild ride nature

warning this is an independent addition to what if meant to enhance your experience of the original book if you have not yet bought the original copy make sure to purchase it before buying this unofficial summary from abookaday analysis the questions in these sections are some of the strangest the author has received in response the author provides a humorous cartoon to both answer and acknowledge the absurdity of these questions these questions are not covered in the following summary as the responses are purely visual overview this review of what if serious scientific answers to absurd hypothetical questions by randall munroe provides a chapter by chapter detailed summary followed by an analysis and critique of the strengths and weaknesses of the book the main theme explored in the book is how we can use science as a way to answer some of life's strangest and most unanswerable questions using data gathered from various sources such as clinical studies scientific journal articles and interviews with top scientific and analytical minds the author is able to provide answers to his audience's most absurd questions the central thesis of the work is that any question humans have ever had about the way the world works or possible ramifications if the world stopped working the way we expect it to can all be answered through scientific

means munroe takes each question from his audience and thoroughly examines it mostly reserving judgement and attempts to find the best answer possible in some cases he provides several different answers and in others even provides answers to questions that the audience did not ask but are related to the subject at hand what makes his responses unique is that he relies on humor and cartoons to explain even the most difficult concepts and this allows for his answers to be easily understood by all of his audience even those with no scientific background randall munroe is the writer and creator of the web comic xkcd and has written a previous book of the same title he worked at nasa as a roboticist until october of 2006 when he became a professional web comic artist full time what if is the result of his popular web comic and a project inspired by it where he asked users to post absurd math and physics related questions he currently resides in cambridge massachusetts available on pc mac smart phone tablet or kindle device c 2015 all rights reserved
