in the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development urban scholars have come to recognize that cities are shaped by forces beyond their boundaries from that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes

inadvertently and that the costs and benefits of economic growth are unevenly distributed but what else needs to be said about the policies and politics of urban development to supplement prevailing theories the politics of urban development argues that the role of local actors in making development decisions merits closer study whatever the structural constraints politics still matters collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population the impact of the collection is to heighten awareness of local political practices and of how and why they make a difference

this report synthesizes and interprets the lessons of more than forty years of development experience together with last year s report on poverty and next year s on the environment it seeks to provide a comprehensive overview of the development agenda the 1990s began with dramatic changes as many countries in eastern europe and elsewhere initiated ambitious reforms of their economic and political systems against the backdrop of these transitions this report links the historical debates that counseled policymakers in their past decisions the lessons of experience and the evolving thought on how best to proceed one of the most valuable lessons relates to the interaction between the state and the market in fostering development it describes a market friendly approach in which governments allow markets to function well and in which governments concentrate their interventions on areas in which markets prove inadequate the report looks at four main aspects of the relationship between governments and markets a investing in people b the climate for enterprises to flourish c the integration of countries with the global economy and d a stable macroeconomic foundation for sustained progress the report stresses that above all the future of developing countries is in their own hands domestic policies and institutions hold the key to successful development

there has been much discussion about the importance of networks for regional economic development and knowledge dissemination however the inflationary use of the notion networks is often based on rather metaphorical at worst fuzzy meanings this book explores ways for more rigorous research on knowledge networks critically discussing quantitative social network analysis a theoretical framework for meaningful interpretations in quantitative network research is developed afterwards the monograph links social network analysis to research on localised knowledge spillovers here the role of communities and networks of knowledge workers is investigated the book illustrates how social network analysis can provide fruitful perspectives for further research on knowledge flows back cover
