il presente testo realizzato con il contributo di competenza ed esperienza di vari docenti e ricercatori viene proposto come una guida all'analisi farmaceutica i cui obiettivi possono essere così delineati: identificazione di una sostanza medicinale e caratterizzazione sia della sua struttura chimica che dello stato fisico (solido cristallino o amorfo) sotto cui si presenta; analisi qualitativa per i loro effetti su attività terapeutica e tossicità; determinazione del contenuto di sostanze medicinali in formulazioni farmaceutiche o estratti da piante medicinali e di eventuali loro impurezze; analisi quantitativa; elementi fondamentali per definirne la qualità; sviluppo di metodologie separative e tecniche estrattive; impiego di tecniche analitiche mirate indispensabili per conseguire gli obiettivi sopra riportati. Questa nuova edizione conserva l'impostazione generale della precedente ma si arricchisce di due nuovi capitoli: il primo si propone di approfondire le linee guida utili per la scelta e l'applicazione corretta di metodi analitici per il controllo di materie prime medicinali e loro formulazioni; il secondo affronta le problematiche dell'analisi dei farmaci biotecnologici, classe di farmaci emergenti che richiede un approccio analitico nuovo e avanzato. Nel suo complesso il testo intende fornire agli studenti di discipline farmaceutiche un percorso formativo graduale e coerente dove i principi di base si integrano con gli aspetti applicativi in modo da pervenire ad una visione ordinata e una conoscenza aggiornata delle problematiche da affrontare e delle principali tecniche analitiche impiegate nei moderni laboratori di analisi farmaceutica.

Il volume XLVI 2019 contiene una sezione monografica dedicata ad analizzare l'uso dell'archeologia nello specifico postclassico nella costruzione di identità in area mediterranea. Gli esempi presi in considerazione vanno dalla Slovenia uscita dalla seconda guerra mondiale alla Tunisia della fine dell'800, dalla Spagna attuale il caso del mercato del Born a Barcellona e Franchista alla Grecia e all'Albania. L'obiettivo è quello di riflettere sulla forza di manipolazione più o meno consapevole dello strumento archeologico in vari momenti del nostro passato e comunque prima che la diffusione dell'archeologia pubblica introducesse nuovi modelli teorici ed etici di riferimento ad una scala sempre più ampia. Completano il volume una serie di articoli nella sezione notizie scavi e lavori sul campo che illustrano diverse specifiche ricerche dalle Marche all'Emilia Romagna, dall'Abruzzo al Veneto e al territorio alpino, dal Lazio alla Campania e la sezione note e discussioni con contributi su diverse categorie di contesti e di oggetti dalle sepolture ai manufatti. Conclude il volume la sezione recensioni e segnalazioni.
