pathophysiology online is a collection of over 20 online modules developed by learning experts to boost your understanding of the most important and challenging concepts in pathophysiology designed to complement the mccance pathophysiology 7th edition textbook this unique course uses animations interactive activities case studies algorithms and more to enhance your comprehension of pathophysiology outlines for each module provide a complete overview of content to help you quickly and conveniently navigate through the course objectives highlight the most important material for each module module pre tests evaluate your knowledge of normal structure and function and help you assess areas for further study further exploration sections after every pre test help you review content before moving ahead and strengthen your understanding guided reading assignments make learning and review more effective by focusing your reading on the most vital content module exams measure your progress after each completed module rationales for all pre tests and exams make it easy to understand the nature of both correct and incorrect answers over 80 animations with voice over narrations cover key processes and show you how why and in what order disease processes occur narrated algorithms describe complex health and disease processes to help you visualize how reactions progress and interact interactive exercises challenge you to think critically about key aspects of pathophysiology over 600 images including figures charts and diagrams keep you engaged and strengthen your understanding visually case studies presented with clinical figures help you apply theoretical knowledge to real life scenarios discussions on message boards allow you to interact with fellow students and instructors immediate feedback for all activities ensures you learn the correct answers and identify areas for additional practice voice overs explain many algorithms and animations perfect for auditory learners

abstract this study presents a framework for examining the effects of higher order thinking on the achievement of allied health students enrolled in a pathophysiology course a series of clinical case studies was developed and published in an enriched online environment that guided students through the process of developing a solution and supporting it through data analysis and interpretation the series of case study modules scaffolded argumentation through question prompts the modules began with a simple direct problem and they became progressively more complex throughout the quarter a control group was assigned a pencil and paper case study based upon recall the case studies were scored for content accuracy and evidence of higher order thinking skills higher order thinking was measured using a rubric based upon the toulmin argumentation pattern the results indicated implementing a case study of either online or traditional format was

associated with significant gains in achievement the enhanced case studies were associated with modest gains in knowledge acquisition the argumentation scores across the series followed two trends directed case studies were associated with higher levels of argumentation than ill structured case studies and there appeared to be an inverse relationship between the students argumentation and content scores the protocols developed for this study can serve as a template for a larger extended investigation into student learning in the online environment

information in varied formats facilitates learning this philosophy is embodied in pathophysiology online it provides accessible easy to understand information about such complex subjects as immunology or the endocrine system it is not just a multimedia learning aid for students providing engaging activities like case studies and critical thinking questions it is also a valuable teaching aid for faculty to help them deliver difficult information more effectively with features like online testing and open discussion boards hundreds of engaging activities and exercises to challenge you to think critically about key aspects of pathophysiology while making learning entertaining over 60 specially created narrated animations to help you visualize some of the most challenging pathophysiologic processes accessible easy to understand additional explanations and exercises for complex topics such as genetics and immunology to help you master this important content over 400 high quality images to illustrate difficult concepts and key clinical presentations of disease processes for all body systems case studies throughout to help you develop critical thinking skills and apply what you ve learned to real world situations pre tests for every major body system to help you test your knowledge of normal structure and function before alterations in function are introduced and if you have trouble review resources are right there to help you prepare immediate feedback on all activities and assessments throughout reinforcing learning and encouraging subject mastery rationales for both correct and incorrect responses to help you not only know when an answer was correct or incorrect but why structured discussion topics with thought provoking questions that you can discuss with other students a built in glossary to provide quick easy access to definitions of new and unfamiliar terms further exploration sections provide carefully reviewed resources for core topics so you can focus on learning new information not searching for it

this money saving package includes copstead kirkhorn s pathophysiology 4th edition textbook and the innovative learning tool pathophysiology online

finally there s a nursing pharmacology text that s just right for you readable to the point pharmacology information is paired with the nursing considerations you need to administer drugs monitor their effects and educate patients both quickly and effectively
