planning theory expresses a sound unease about the direction taken by the current analysis and criticism of planning experiences both in the field of economics and in urban and regional planning instead of seriously revising the technical and scientific shortcomings marking the various problems encountered in the planning experience in both fields academic debates and reflection have instead led to a kind of political interpretation on the basis of the hopelessness of improving the governance of managerial and political planning initiatives planning theory has been reduced to a generic sociological debate on planning itself a debate that freezes planning as a permanently declining engagement to oppose this the present book aims to identify the essential guidelines of a re launch of planning processes and techniques configuring a kind of neo discipline called planology by the author which builds upon a multi disciplinary integration never seen and experimented with until now of economic environmental and sociological approaches a
