the book of burial defined fengshui for the first time it integrated various local beliefs and practices into the dominant

confucian tradition it is therefore key to any understanding of chinese culture based on the edition of the book of burial zang shu most popular during the last millennium this translation makes available the text that links the widespread chinese practice of fengshui geomancy to the fundamental beliefs and moral principles of chinese culture this annotation and commentary serve to place the text and the history of burial ritual in the proper cultural context the translator s introduction which explores the questions of the interaction between elite and folk culture and the continuity of tradition suggests an interdisciplinary approach to the study of fengshui

specific chinese models for theories of knowledge were premised upon a structurally ordered external reality since natural or cosmic order is organic it naturally follows the flow of structural patterns and operates in accordance with structural principles that regulate every existence in this worldview our mind is also structured in accordance with this all embracing but open organic system the axioms of our recognition and thought are therefore not arbitrary but follow this rationally designed structure the compatibility of both the cosmic and mental structures is the basic precondition that enables humans to perceive and recognize external reality the present study shows that this paradigm of structural epistemology can already be found in the earliest chinese theories of knowledge the introduction of chinese models and their incorporation into western discourses fills an important theoretical gap in the western model of structuralism this book offers an insight into epistemological systems that arose outside the discourses of the euro american tradition it can thus help us to eliminate and supersede certain culturally conditioned prejudices as to the superiority and omnipresence of western theoretical models while demonstrating incontrovertibly that the results of western discourses are by no means the only force driving theoretical innovation at the present time
