this systems thinking special issue contains 12 papers on the nature of systems thinking as it applies to systems engineering systems science system dynamics and related fields

systems thinking can be broadly considered the activity of thinking applied in a systems context forming a basis for fundamental approaches to several systems disciplines including systems engineering systems science and system dynamics although these are somewhat distinct fields they are bound by common approaches in regard to systems whereas systems engineering seeks to apply a multidisciplinary holistic approach to the development of systems systems science seeks to understand the basics related to systems of all kinds from natural to man made and system dynamics seeks to understand system structures in order to influence its dynamics man made systems have become more ubiquitous and complex the study of systems both natural and engineered presents new challenges and opportunities to understand emergent dynamic behaviors that inform the process of sense making based on systems thinking

this book provides a unique exposé of women in family businesses in the Australian commercial fishing industry and explores their visibility contributions barriers and opportunities for participation and knowledge recognising the need to move beyond an exploration of women's roles this book applies a detailed well articulated and sophisticated feminist post structural approach which explores women's identity power knowledge and positioning in relation to the current industry climate in the context of discourses of crisis and sustainability this is particularly pertinent with climate change looming as the next industry crisis as such this book has significant interdisciplinary appeal and will benefit feminist gender natural resource management and fisheries scholars and policy makers ultimately it is hoped that this book will have a substantial impact on industry women in both Australia and elsewhere and reduce their marginalisation increase awareness about their contributions and result in greater opportunities to voice their unique knowledge on social issues with a view to enhancing industry sustainability
