In the third edition of the Psychology Research Handbook, editors Frederick T. L. Leong and James T. Austin have assembled experienced expert researchers to provide graduate students and research assistants with a comprehensive framework for conducting many types of psychology research. The book is organized around the idea of a research script following the step-by-step process of research planning, design, data collection, analysis and disseminating research. Many chapters are coauthored by advanced graduate students to give their fellow students a sense of real world research, adding to the clarity and practicality of many chapters. Students and instructors alike will appreciate chapters on topics typically missing from introductory methods texts, including applying for research grants, dealing with journal editors and reviewers, working within research teams and conducting cross-cultural research. Structures such as recommended readings and exercises guide students to develop and expand their research skills. New chapters include power and evidence, IRB as critical collaborators in research, alternative data collection strategies, structural equation modeling and replicability and reproducibility. A comprehensive, easy-to-understand guide to the entire research process, this book quickly and efficiently equips advanced students and research assistants to conduct a full research project.

This book provides a comprehensive presentation of psychological problems such as posttraumatic stress, depression and chronic pain that are the result of injury or trauma and legal proceedings such as tort after motor vehicle collisions.
