master s thesis from the year 2021 in the subject english language and literature studies linguistics grade 65 00 university of leicester course applied linguistics and tesol language english abstract this study aims to determine the perceived mutual intelligibility of regional indian english rie accents from the standard indian english sie speakers perspective find out if there is attitudinal bias among young sie speakers towards rie speakers based on the english medium vernacular medium em vm divide and if the bias has any effect on the perceived intelligibility of rie accents this study aims to look into the phenomenon of bias as well however as bias is an implicit characteristic that is generally kept veiled from public scrutiny it could not be incorporated in the questionnaire for analysis as a result it was not included overtly as a research question either primarily also because determining the acceptability of an accent a main research question implies looking for instances of stereotyping and stereotyping creates the very conditions for bias to grow and fester hence as bias is a result of a process this study will attempt to statistically shed light on this subject through data interpretation accents tell the story of who you are in terms of being the most revealing predictors of a speaker s geographical origins and social background including perceived educational levels professional status social class and identity these social and acoustic aspects of an accent often give rise to stereotypes and value judgements of the speakers and or groups especially if it differs in noticeable ways from established pronunciation patterns this leads to negative reactions or language attitudes that are reflected in systemic discrimination in areas of education and employment it can be argued that to eschew this discriminatory practice of stereotyping non native or foreign accents the intelligibility construct emerged as early as 1900 henry sweet as an alternative egalitarian l2 pronunciation target option for l2

learners hence intelligibility of L2 speech pattern found itself to be one of the main concerns of accents in the study of accents the object of study is not so much the speaker's speech style but the listener's hearing and understanding Munro makes a further salient point by noting that the effect of accents on communication can be best judged by an unsophisticated listener to see how understandable L2 speakers are within their community this kind of judgement data of listeners' perceptions are considered to be gold standard

a philosophy of games to help us win back control over what we value the philosopher C Thi Nguyen one of the leading experts on the philosophy of games and the philosophy of data takes us deep into the heart of games and into the depths of bureaucracy to see how scoring systems shape our desires games are the most important art form of our era they embody the spirit of free play they show us the subtle beauty of action everywhere in life in video games sports and boardgames but also cooking gardening fly fishing and running they remind us that it isn't always about outcomes but about how glorious it feels to be doing the thing and the scoring systems help get us there by giving us new goals to try on scoring systems are also at the center of our corporations and bureaucracies in the form of metrics and rankings they tell us exactly how to measure our success they encourage us to outsource our values to an external authority and they push on us to value simple countable things metrics don't capture what really matters they only capture what's easy to measure the price of that clarity is our independence the score asks us is this the game you really want to be playing

academic paper from the year 2020 in the subject psychology work business organisation grade 10 msb medical school berlin hochschule für gesundheit und medizin language english abstract toxic leadership is a serious issue that can certainly have many different facets and causes for today management is still an area that is fairly dominated by male employees this paper aims to take a closer look at the socio cultural causes of toxic leadership that could lie in the role of the traditional man i ask myself the question how does our cultural understanding of how male leadership should look influence how leaders deal with subordinates could find expression in toxic leadership this paper introduces the reader to a recently proposed organizational culture called masculinity contest culture MCC where negatively expressed masculinity norms serve as a fertile breeding ground for toxic leadership furthermore i introduce another study that connects toxic leadership with the social

dominance orientation sdo and status enhancement motive which could be closely related to the mcc the last study deals with gender differences aligning with characteristics of follower groups from padilla et al 2007 toxic triangle and gender differences in the perception of toxic leadership they found that women view toxic leadership more negatively as well as detect significantly more subtle forms of toxic leadership than men

a new analytical perspective on stones and stone masters across southeast asia that extends and deepens the recent literature on animism stones and stone masters are an important focus of animist religious practice in southeast asia recent studies on animism see animist rituals not as a mere metaphor for community or shared values but as a way of forming and maintaining relationships with occult presences this book features city pillars statues megaliths termite mounds mountains rocks found in forests and stones that have been moved to shrines as well as the territorial cults which can form around them the contributors extend and deepen the recent literature on animism to form a new analytical perspective on these cults across mainland southeast asia not just a collection of exemplary ethnographies stone masters is also a deeply comparative volume that develops its ideas through a meshwork of regional entanglements parallels and differences before entering into a dialogue with debates on power mastery and the social theory of animism globally

lesson plan from the year 2022 in the subject didactics for the subject english grammar style working technique grade 10 university of flensburg language english abstract with a focus on the development of listening comprehension through storytelling this term paper analyses the

children's book walking through the jungle by Julie Lacome. It is divided into two main sections. The first part focuses on the relevance of listening comprehension and storytelling, providing the basis for the following analysis. In the second part, possibilities are displayed to include the story in a sample teaching unit for year three. First criteria for selecting a story will be presented. Subsequently, the role of the teacher and how one should prepare the story will be displayed. Moreover, there will be a chapter for pre-listening activities, while listening activities and post-listening activities for the story. Finally, the language development through walking through the jungle will be summarised and discussed in the conclusion.

The book has eleven chapters, mostly by Indonesia-based analysts, plus a couple of wise old hands. Max Lane's overview chapter is excellent.
