This book is published during a phase of crisis and transformation for the automobile industry across the world. This crisis is particularly acute in Europe and the United States. The book is written especially for the non-specialist with more than a passing interest in the sector, such as experts of other sectors, trade unionists, representatives of the corporate world, policymakers, and public managers who deal with industry, commerce, and public planning. The authors provide up-to-date information and assessments of what is actually taking place, with particular attention paid to the sub-supply companies. The main focus lies on four European countries: Germany, Spain, Sweden, and Italy, each of which is significant for its different experiences. Finally, three important non-European situations: the United States, Brazil, and Japan, are examined.
