This title examines current research in materials development and discusses their implications for the learning and teaching of languages. Recently, there has been a dramatic increase in the attention given to materials development as an academic discipline; more universities are including modules on materials development on their MA in Applied Linguistics courses, and more students are studying materials development in their PhD research. Yet to date, there has been no publication focusing on reporting and discussing the results of research in materials development. This fills that gap, reporting on the results of recent research projects in materials development and discussing their implications for the learning and teaching of languages. The editors' introduction outlines the rationale, scope, and objectives of the book and reviews previously published reports of research in materials development. There are concluding chapters which point out implications for second language acquisition theory and research methodology. The book features suggested applications of the reported research for materials development and proposals for future action in research in materials development for language teaching.

Designed to help students explore interactions in both personal and professional domains and develop the specific skills necessary to creating and maintaining healthy relationships, *Interact: Interpersonal Communication Concepts, Skills, and Contexts*, fourteenth edition, retains the features that have made this book so successful: a theory-driven and skills-based focus, an accessible tone and presentation, and a multitude of useful pedagogical tools. For this edition, new coauthor Erin MacGeorge has brought her in-depth knowledge of current theory to bear on each chapter, thoroughly updating the material so that it reflects the current state of knowledge in the discipline. Lively and well-written, *Interact* features numerous activities that enable students to relate their everyday experiences to their studies in communication. It also addresses readers' experiences of communicating across differences in individual identity, gender, and culture, with a strong focus on the importance of ethics. This leading text encourages students to develop their analytic abilities as they think critically about key concepts in interpersonal communication.
