water is one of the critical factors of animal production drawn from nature milk production in india witnessed sharp rise through operation flood programme and retaining

veritable position as the world's largest milk producing nation groundwater resources account for 64 per cent of irrigation on the other hand groundwater table is falling due to extensive use of irrigation water dairying is a water intensive activity and direct water use is only a negligible portion of total water use in dairying as virtual water use is very high in this context present study was carried out in mysuru and chamarajanagar districts of karnataka state with the objectives i to study cost of milk production and water use efficiency in milk production under different levels of groundwater exploitation ii to estimate the technical efficiency of milk production under different levels of groundwater exploitation iii to work out private and social cost of groundwater use in milk production the study was undertaken during 2012-13 enveloping 8 villages and 240 households rearing dairy animals mysuru and chamarajanagar districts provided a good background for the undertaken study as the region represented different levels of ground water use progressive dairy farming area appropriate analytical tools were employed for analysis the study indicated variations in cost of milk production across the region and animal breeds by and large 60 to 70 per cent of the milk production cost was on account of feed cost and it was slightly higher in overexploited area about 90 per cent of the total cost of milk production was shared by total variable cost milk production cost crossbreds was highest 19.38 liter in overexploited areas and least 16.68 liter in safe areas cost of local cow milk production was highest 29.51 liter in critical and overexploited 27.58 liter and comparatively less 24.04 liter safe areas cost of milk production of buffalo was highest in overexploited 26.34 liter and was relatively lower 22.19 liter safe area

basically being a study of how a society organises its money economics continuously enhances in scope as new economic policies are formulated every year by all countries across the world accordingly new terms keep cropping up frequently which make the subject all the more obscure and difficult with a view to make the subject easily comprehensible for students specialising in the field and also the common man who are directly or indirectly related to it the dictionary of economics has been prepared aiming at maximum inclusion of words both conventional and latest the present dictionary provides in brief the exact explanation of chosen terminology in a language deliberately kept simple so as to enable the users to understand them at once apart from this it has been skilfully designed such that even the less experienced or intelligent users may locate the desired terms without difficulty the unique feature that distinguishes it from other dictionaries on the subject is that it introduces the readers to the leading economists of the world and their theories as well this dictionary will prove indispensable to the students and teachers of economics even the

business people as well as general readers who want to keep abreast of the latest economic trends that influence almost every aspect of modern life will find it a valuable source

vol 2 33 include papers read at the annual conference of the indian economic association

the indian economy continues to grow rapidly taking in its stride poor harvests and rising oil prices industrial output has increased to double digit levels accompanied by rising levels of savings and investment an important factor in this process has been india s relative political stability what are the constraints to maintaining a high rate of growth over the next decade or two these questions acquire special significance as we try to understand long term growth in the current context of global economic slowdown the papers in this volume seek to answer these questions

this book aims to trigger a wider examination of asian economic integration it looks at the institutional progression of regional economic integrations in countries in asia including japan korea and china it also looks at india s participation in the asian market and how it will affect other east asian countries

fiji has distinct institutional features that make it an ideal case for examining and discussing the consequences of institutional arrangements particularly the nature of property rights for national economic performance development prospects and the state of the environment which in turn reflects a nation s ability to achieve sustainable development furthermore the nature of institutional arrangements in fiji can be used to illustrate aspects of both the new and the old institutional economics apart from the fact that fiji provides considerable scope for the exploration of institutional economics and its applications fiji is a comparatively important island nation in the south west pacific that is an important member of the pacific island forum grouping of 14 island nations the recent development of fiji has been much influenced by its social history particularly by its institutional structures established or codified during british colonial rule its present racial composition is largely a product of british colonisation of indians brought to fiji by the british to produce sugar cane as a contribution to the economic development of the former british empire in many respects the type of global

imperialism that was well established during the nineteenth century was a forerunner to modern economic globalisation which involves a mixture of free trading blocs and multilateralism the current population mixture of fiji consisting of about equal numbers of indian fijians and indigenous fijians has its roots in fiji s colonial history furthermore the codified systems of property rights which largely excludes indian fijians from the ownership of land was established by the british it has been a major source of ethnic tension and of social and political conflict in fiji we show that this system of property rights has had important negative consequences for economic growth in fiji for the economic performance of its industries and for the conservation of its natural resources natural resources which may not be equitable and which also does not appear to be efficient administratively this adds to social and political tension in fiji

indian economy is undergoing structural changes the share of agriculture and allied activities in gdp has declined over the years on farm jobs are diminishing or stagnant there is a need to generate off farm jobs through secondary and tertiary processing of agriculture crop horticulture animal husbandry fisheries forest produce raw material and these are not increasing to keep pace with the needs despite potential in india more than 75 of agro processing is done by informal and small enterprises but most informal and small unit suffer from market and technology constraints therefore they cannot go for higher value addition from the main products and from the by products these informal and small enterprises are not in a position to create an integrated value chain which can have links with the farmers as technology is outmoded these units are not in a position to give quality assurance and meet food safety standards their products are marketed only in less demanding nearby local markets world over there is transition from informal and small agro industrial enterprises to large units which are competitive in terms of price and quality equitable not exploiting any member of value chain and inclusive treating farmers as strategic business partners rather than adversaries they use latest and innovative technology and have national and international markets for selling their products they enjoy scale economies are able to comply with national and international standards of quality assurance and go for higher level of value addition they can forge linkages with the farmers through contract farming and direct procurement and assure their raw material supply by treating the farmers as strategic business partners but these enterprises require the enabling conditions which make it possible to run the enterprises profitably along with transformation of rural areas over the years the government of india and nearly all the state governments have now created most attractive enabling environment therefore in our assessment

india is poised for a great leap in investments in food processing and marketing the book contains 18 chapters dealing with the entire project cycle of agro industries for sustainable rural transformation the most insightful part is the 12 real life case studies the book would be useful to agro entrepreneurs agro processing industries policy makers bankers management consultants students of agriculture universities cooperative management training institutions and mba students

this book explores structural changes in india s agrifood systems during the next ten to twenty years the dynamics in the agrifood sector is explored in the context of the overall economy taking into account agricultural and trade policies and their impacts on national and global markets the contributors draw on qualitative and quantitative approaches using both a national model to focus on urban rural relations and income distribution and an international model to focus on patterns of economic growth and international trade

maharashtra is an important state of india so far as its contribution to the agriculture development of the country is concerned during the last four decades the agricultural sector of maharashtra has undergone lots of changes though agricultural performance improved during the last forty years its progress was not sustained and showed wide fluctuations in fact the important characteristics of maharashtra agriculture are the instability in crop production and significant regional variations in the performance of agriculture in the state the recent farmer suicides in vidarbha and marathawada have once again highlighted regional disparity in maharashtra the agrarian crisis in vidarbha has spun almost out of control there are a number of factors which limit the growth of agriculture over the years in the state it is therefore necessary to look into the factors affecting agricultural growth

the book provides conceptual understanding of essential concepts in business life it details the foundations of business economics with special emphasis on demand analysis and consumer behaviour it also discusses analysis of production and cost of the firm market structures and pricing of products factor pricing and income distribution and concludes with the discussion of capital budgeting based on the author s extensive teaching experience the book champions a collaborative approach to

delivering an appropriate textbook that is curriculum relevant
