Handbook of Biometrics Telecommunications in Africa Jane's All the World's Aircraft Proceedings of the IEEE Computer Society Workshop on the Application of Personal Computing to Aid the Handicapped Journal of Gas Lighting Journal of Gas Lighting and Water Supply Sagem user manual *Anil K. Jain Eli M. Noam*

biometrics is a rapidly evolving field with applications ranging from accessing one's computer to gaining entry into a country the deployment of large scale biometric systems in both commercial and government applications has increased public awareness of this technology recent years have seen significant growth in biometric research resulting in the development of innovative sensors new algorithms enhanced test methodologies and novel applications this book addresses this void by inviting some of the prominent researchers in biometrics to contribute chapters describing the fundamentals as well as the latest innovations in their respective areas of expertise

a modern telecommunications network is an essential infrastructure for the world's developing nations the emergence of new technologies the entrance of supra national carriers and deregulation in the telecommunications sector have resulted in the globalization of telecommunications and the opening of markets on every continent collecting the work of 19 expert contributors this book provides a comprehensive examination of what african countries are doing to build their telecommunications capabilities africa has historically lagged behind other regions in developing its telecommunications infrastructure and the penetration rate for basic service is still relatively low but as some african nations undergo restructuring they have begun to open their networks to foreign investors and regional cooperative ventures to expand basic and advanced telecommunications services the contributors discuss the uneven pace of economic regulatory and social change among african nations as state telecommunications monopolies maintain their hold in some countries and give way to privatization in others analyzing the political and economic changes of the 1990s the contributors provide clues about how africa can shake off decades of inertia and prepare to take part in the global information economy edited by an internationally recognized authority on telecommunications this volume

is the latest in a series that surveys telecommunications in the major regions of the world thorough and accessible it is a valuable resource for students and scholars in the areas of communications economics regulatory law telecommunications engineering and african studies as well as telecommunications professionals and policy makers
