this book examines the chinese fictions xiaoshuo published between 1898 and 1927 three pivotal decades during which china underwent significant social changes it applies narratology and sociology of the novel methods to analyze both the texts themselves and the social cultural factors that triggered the transformation of the narrative mode in chinese fiction based on empirical data the author argues that this transformation was not only inspired by translated western fiction but was also the result of a creative transformation in tradition chinese literature

failure mode and effect analysis fmea are used to assess investigate and predict the risk priority number rpn of potential failures within the manufacturing industry the authors use fuzzy logic as a tool to overcome the vagueness associated with traditional methods of assessing potential failures

the divine office the cycle of daily worship other than the mass is the richest source of liturgical texts and music from the latin middle ages however its richness the great diversity of its manuscripts and its many variations from community to community have made it difficult to study and it remains largely unexplored terrain this volume is a practical guide to the divine office for students and scholars throughout the field of medieval studies the book surveys the many questions related to the office and presents the leading analytical tools and research methods now used in the field beginning with the office in the early middle ages the book covers manuscript sources and their contents regional developments and variations the relationship between the office the mass and other ceremonies and repertories and the deep links between the office and medieval hagiography the book concludes with a discussion of recent technical advances for handling the enormous amounts of evidence on the office and its performance in particular cantus the vast electronic database developed by ruth steiner of catholic university for the analysis of chant repertories the divine office in the latin middle ages is an essential resource for anyone studying medieval liturgy its accessible style and broad coverage make it an important basic reference for a wide range of students and scholars in art history religious studies social history literature musicology and theology

since george gaylord simpson published tempo and mode in evolution in 1944 discoveries in paleontology and genetics have abounded this volume brings together the findings and insights of today s leading experts in the study of evolution including ayala w ford doolittle and stephen jay gould the volume examines early cellular evolution explores changes in the tempo of evolution between the precambrian and phanerozoic periods and reconstructs the cambrian evolutionary burst long neglected despite darwin s interest in it species extinction is discussed in detail although the absence of data kept simpson from exploring human evolution in his book the current volume covers morphological and genetic changes in human populations contradicting the popular claim that all modern humans descend from a single woman this book discusses the role of molecular clocks the results of evolution in 12 populations of escherichia coli propagated for 10 000 generations a physical map of drosophila chromosomes and evidence for hitchhiking by mutations

the world is currently facing the urgent and demanding challenges of saving and utilizing energy as efficiently as possible materials science where chemistry meets physics has garnered a great deal of attention because of its versatile techniques for designing and producing new desired materials enabling energy storage and conversion this book is a comprehensive survey of the research on such materials unlike a monograph or a review book it covers a wide variety of compounds details diverse study methodologies and spans different scientific fields it contains cutting edge research in chemistry and physics from the interdisciplinary team of ehime university japan the members of which are currently broadening the horizon of materials sciences through their own ideas tailored equipment and state of the art techniques edited by toshio naito a prominent materials scientist this book will appeal to anyone interested in solid state chemistry organic and inorganic semiconductors low temperature physics or the development of functional materials including advanced undergraduate and graduate level students of solid state properties and researchers in metal complex science materials science chemistry and physics especially those with an interest in semi conducting and or magnetic materials for energy storage and conversion
