this book presents a structured framework for decision making and leadership in turbulent environments focusing on the three dimensional 3d thinking framework the use of hindsight insight and foresight to navigate

complexity contextual intelligence helps readers respond to rapid changes in organizational and personal settings Dr. Kutz's 3D thinking framework and R4 process recognize, reorder, respond, reflect, integrate past insights, present intuition, and future aspirations into problem-solving strategies. Kutz simplifies complex concepts like VUCA (volatility, uncertainty, complexity, ambiguity), synchronicity, and tacit knowledge into actionable insights. This updated edition offers expanded content, practical examples, and new chapters on behaviors linked to contextual intelligence, enhancing 3D thinking. Full of cases and anecdotes, each chapter concludes with critical thinking questions and tools to assess and enhance contextual intelligence, guiding leaders in mastering complexity and leading with confidence.

This book offers a structured framework for critical thinking and decision-making that shows how to use hindsight, insight, and foresight to navigate through complexity. Every organization and every person faces rapid change and complexity; contextual intelligence—understanding fully the context in which one is operating—teaches the reader how to navigate that complexity and respond appropriately in the face of change, expected and unexpected. The three-dimensional 3D thinking™ framework helps structure critical thinking by showing how to appropriately bring past experience, present intuition, and future ambiguity into other words: hindsight, insight, and foresight to bear on any given problem. Kutz offers a way to rationally organize difficult concepts such as complexity, tacit knowledge, and synchronicity into usable and understandable language but more importantly teaches the reader how to apply these concepts in a very practical and meaningful way with measurable and tangible outcomes. The book also describes in detail 12 behaviors associated with contextual intelligence: four behaviors are associated with hindsight, four with insight, and four with foresight. The book takes the reader through the 12 behaviors and how they relate to 3D thinking. Cases and anecdotes are used generously to provide examples. Chapters are followed by critical thinking questions and questions related to the cases in the chapters. Furthermore, questions and practical tools are introduced that help the reader assess and determine their level of contextual intelligence.
