this doctoral thesis applies measurements of ground deformation from satellite radar using their potential to play a key role in understanding volcanic and magmatic

processes throughout the eruption cycle however making these measurements is often problematic and the processes driving ground deformation are commonly poorly understood these problems are approached in this thesis in the context of the cascades volcanic arc from a technical perspective the thesis develops a new way of using regional scale weather models to assess a priori the influence of atmospheric uncertainties on satellite measurements of volcano deformation providing key parameters for volcano monitoring next it presents detailed geodetic studies of two volcanoes in northern california medicine lake volcano and lassen volcanic centre finally the thesis combines geodetic constraints with petrological inputs to develop a thermal model of cooling magma intrusions the novelty and range of topics covered in this thesis mean that it is a seminal work in volcanic and magmatic studies

this paper develops a structural macroeconometric model of the world economy disaggregated into forty national economies this panel dynamic stochastic general equilibrium model features a range of nominal and real rigidities extensive macrofinancial linkages and diverse spillover transmission channels a variety of monetary policy analysis fiscal policy analysis macroprudential policy analysis spillover analysis and forecasting applications of the estimated model are demonstrated these include quantifying the monetary fiscal and macroprudential transmission mechanisms accounting for business cycle fluctuations and generating relatively accurate forecasts of inflation and output growth

seminar paper from the year 2009 in the subject business economics business management corporate governance grade 1 3 frankfurt school of finance management language english abstract global warming is a major threat for the generations to come although the conduct of business around the globe is a primary issue for climate change especially multinational companies can hardly be regulated by national governments since the compliance with environmental standards can not be enforced effectively it is up to the corporations to fulfill their responsibilities to the environment this paper seeks to provide an ethical reasoning for the obligations corporations have to the environment furthermore the nature of this responsibility will be examined in order to develop a basic guideline for the decision makers in the companies

includes special sessions

this is the first book devoted to churches in ireland dating from the arrival of christianity in the fifth century to the early stages of the romanesque around 1100 including those built to house treasures of the golden age of irish art such as the book of kells and the ardagh chalice carrag in s comprehensive survey of the surviving examples forms the basis for a far reaching analysis of why these buildings looked as they did and what they meant in the context of early irish society carrag in also identifies a clear political and ideological context for the first romanesque churches in ireland and shows that to a considerable extent the irish romanesque represents the perpetuation of a long established architectural tradition
