for those who believe that there must be a more agile and efficient way for people to get things done here is a  
brilliantly discursive thought provoking book about the leadership and management process that is changing  
the way we live in the future historians may look back on human progress and draw a sharp line designating  
before scrum and after scrum scrum is that ground breaking it already drives most of the world s top  
technology companies and now it s starting to spread to every domain where leaders wrestle with complex  
projects if you ve ever been startled by how fast the world is changing scrum is one of the reasons why  
productivity gains of as much as 1200 have been recorded and there s no more lucid or compelling explainer  
of scrum and its bright promise than jeff sutherland the man who put together the first scrum team more than  
twenty years ago the thorny problem jeff began tackling back then boils down to this people are spectacularly  
bad at doing things with agility and efficiency best laid plans go up in smoke teams often work at cross  
purposes to each other and when the pressure rises unhappiness soars drawing on his experience as a west  
point educated fighter pilot biometrics expert early innovator of atm technology and v p of engineering or cto  
at eleven different technology companies jeff began challenging those dysfunctional realities looking for  
solutions that would have global impact in this book you ll journey to scrum s front lines where jeff s system  
of deep accountability team interaction and constant iterative improvement is among other feats bringing the  
fbi into the 21st century perfecting the design of an affordable 140 mile per hour 100 mile per gallon car  
helping npr report fast moving action in the middle east changing the way pharmacists interact with patients  
reducing poverty in the third world and even helping people plan their weddings and accomplish weekend  
chores woven with insights from martial arts judicial decision making advanced aerial combat robotics and  
many other disciplines scrum is consistently riveting but the most important reason to read this book is that it  
may just help you achieve what others consider unachievable whether it be inventing a trailblazing  
technology devising a new system of education pioneering a way to feed the hungry or closer to home a  
building a foundation for your family to thrive and prosper
