christopher alexander s series of ground breaking books including a pattern language and the timeless way of building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns now in the nature of order alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities in the phenomenon of life the first volume in this four volume masterwork alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture with this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region he introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his

observations all wholeness is built alexander argues that living structure is at once both personal and structural taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart a step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united

nations around the world are experiencing a spectacular increase in longevity society as a whole is being challenged by issues arising from this revolution in longevity although the specter of the loneliness and existential suffering of older citizens is such that some people under the age of 65 find it difficult to conceive of a long term future persons over 85 have proven that aging does not necessarily preclude a healthy and productive life extraordinary progress in both curative and preventive medicine justifies optimism about the quality of life and state of well being that can be enjoyed even in great old age we should look to professionals in diverse fields to develop creative solutions to the inevitable issues that will arise with aging governments must prepare for the future health of their citizens by making long term investments to educate all sectors of society in the value of good nutrition exercise and lifestyles that enhance well being throughout life also governments should realize that the main cause of health care expenditure is serious illness which occurs in persons of all ages and not predominantly in older people early detection can help save lives as well health and longevity of life will ultimately end as a political issue what is needed is long term government investments necessary for a viable health policy the question arises will world leaders be able to commit to such a policy two major socioeconomic phenomena may have a regulating effect on this issue the first is the emergence of pressure groups that have come into being in response to a particular health issue such as aids the second is the emergence of ethics committees in developed nations that deal solely with health issues

a never before published novel from beloved author zora neale hurston revealing the historical herod the great not the villain the bible makes him out to be but a religious and philosophical man who lived a life of valor and vision in the 1950s as a continuation of moses man of the mountain zora neale hurston penned a historical novel about one of the most infamous figures in the bible herod the great in hurston's retelling herod is not the wicked ruler of the new testament who is charged with the slaughter of the innocents but a forerunner of christ a beloved king who enriched jewish culture and brought prosperity and peace to judea from the peaks of triumph to the depths of human misery the historical herod appears to have been singled out and especially endowed to attract the lightning of fate hurston writes an intimate of both marc antony and julius caesar the judean king lived during the first century bce in a time of war and imperial expansion that was rife with political assassinations and bribery as the old world gave way to the new portraying herod within this vivid and dynamic world of antiquity little known to modern readers hurston's unfinished manuscript brings this complex compelling and misunderstood leader fully into focus hurston shared her findings about herod's rise his reign and his waning days in letters to friends and associates text from three of these letters concludes the manuscript in an intimate way scholar editor deborah plant's commentary a story finally told assesses hurston's pioneering work and underscores hurston's perspective that the first century bce has much to teach us and that the lens through which to view this dramatic and stirring era is the life and times of herod the great

this handbook presents a broad overview of the current research carried out in environmental psychology which puts into perspective quality of life and relationships with living spaces and shows how this original analytical framework can be used to understand different environmental and societal issues adopting an original approach this handbook focuses on the links with other specialties in psychology especially social and health psychology together with other disciplines such as geography architecture sociology anthropology urbanism and engineering faced with the problems of society which involve the quality of life of individuals and communities it is fundamental to consider the relationships an individual has with his different living spaces this issue of the links between quality of life and environment is becoming increasingly significant with at a local level problems resulting from different types of annoyances such as pollution and noise while at a global level there is the central question of climate change with its harmful consequences for humans and the planet how can the impact on well being of environmental nuisances and threats for example natural risks pollution and noise be reduced how can the quality of life within daily living spaces home cities work environments be improved why is it important to understand the psychological issues of our relationship with the global environment climatic warming ecological behaviours this handbook is intended not only for students of

various disciplines geography architecture psychology town planning etc but also for social decision makers and players who will find in it both theoretical and methodological perspectives so that psychological and environmental dimensions can be better taken into account in their working practices
