in king leopold ii s infamous congo free state at the turn of the century severed hands became a form of currency but some in the belgian government had no sense of historical shame as they connived for an independent katanga state in 1960 to protect belgian mining interests what happened next was

extraordinary it was an extremely uneven battle the un fielded soldiers from twenty nations america paid the bills and the soviets intrigued behind the scenes yet to everyone s surprise the new nation s rag tag army of local gendarmes jungle tribesmen and controversially european mercenaries refused to give in for two and a half years katanga the scrawniest underdog ever to fight a war held off the world with guerrilla warfare two faced diplomacy and some shady financial backing it even looked as if the katangese might win katanga 1960 63 tells for the first time the full story of the congolese province that declared independence and found itself at war with the world

published in 1991 the self determination of minorities in international politics is a valuable contribution to the field of politics

outbursts of regional conflict within national boundaries have characterized recent years sub national states including parts of the soviet union india canada and yugoslavia dissatisfied with their central governments seek forms of independence to pursue autonomous development paths these region state conflicts have occurred in nations at all levels of development canada and indonesia france and papua new guinea under diverse economic systems the ussr and canada yugoslavia and spain and across political systems federations such as india and unitary states such as italy bookman s study develops methods whereby both state and region can evaluate the region s potential to sustain economic growth autonomously filling the gap in current perceptions of inter regional relations bookman introduces the concept of discontinuous development to facilitate the analysis of sub national regions that have varying levels of development the volume s emphasis on high income regions within both agricultural and industrial nations and on the economic basis of conflict makes it a unique contribution that assesses the viability of regions as autonomous entities the major part of the volume studies empirical evidence from india and yugoslavia especially timely in light of present ethnic and religious conflicts in both countries the volume is

zaire apparently strong and stable under president mobutu in the early 1970s was bankrupt and discredited by the end of that decade beset by hyperinflation and mass corruption the populace forced into abject poverty why and how in a new african state strategically located in central africa and rich in mineral resources did this happen how did the zairian state become a parasitic predator upon its own people

the people of the congo have suffered from a particularly brutal colonial rule american interference after independence decades of robbery at the hands of the dictator mobutu and periodic warfare which continues even now in the east of the country but as this insightful political history makes clear the congolese people have not taken these multiple oppressions lying down and have fought over many years to establish democratic institutions at home and free themselves from foreign exploitation indeed these are two aspects of a single project
