are the performing arts really supposed to be so radical that as John Cage once said in the context of music there is no noise only sound since he argued that any sounds we can hear can be music (Wk 2007a) and Harwood 1976 this radical tradition in performing arts with music as an example here can be contrasted with an opposing view in the older days when Greek philosophers and medieval theorists in music defined music as tones ordered horizontally as melodies and vertically as harmonies music theory within this realm is studied with the presupposition that music is orderly and often pleasant to hear (Wk 2007a) contrary to these opposing traditions and other views as will be discussed in the book performing arts in relation to both the body and its presence is neither possible nor desirable to the extent that the respective ideologues on different sides would like us to believe needless to say the challenge to these opposing traditions in performing arts does not imply that performing arts are worthless human endeavors or that those fields of study related to performing arts like aesthetics acoustics communication studies psychology culture studies sociology religion morality and so on should be rejected too of course neither of these extreme views is reasonable instead this book provides an alternative better way of understanding the future of performing arts especially in the dialectic context of the body and its presence while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other in other words this book offers a new theory that is the transdisciplinary theory of performing arts to go beyond the existing approaches in a novel way if successful this seminal project will fundamentally change the way that we think about performing arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate

what makes the rule of law so special that it is to conscientiously punish the bad doers and reward the good ones such that where there is the rule of law peace and order are to be expected so that the rule of law is better than the rule of any individual take the case of international law as an illustration while different international courts have been busy going after the killers of innocent victims in Rwanda and Liberia they have turned a blind eye to the major powers which have killed on a much larger and more brutal scale by comparison innocent civilians in Iraq and Afghanistan just to cite two current examples contrary to the conventional wisdom conveniently held by many in human history the rule of law has its other side which has not yet been systematically understood such that the rule of law is neither possible nor desirable to the extent that the defenders of legal institutions in human history would like us to believe lest any misunderstanding hastily occur this is not to imply that the rule of law is absolutely useless or that the literature in jurisprudence and other related fields like political

philosophy ethics law and economics and the sociology of law should be dismissed because of its scholarly irrelevance of course neither of these two extreme views is reasonable either instead this book provides an alternative better way to understand the nature of law in relation to its necessity and contingency in the context of justice while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other in the process this book offers a new theory to transcend the existing approaches in the literature in a new direction in that in the end there is no justice without injustice and that it will be transcended too this seminal project if successful will fundamentally change the way that we think about the nature of law from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what i originally called its post human fate

like other big city school systems chicago s has been repeatedly reformed over the last century yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students many blame the educational establishment for resisting change other critics argue that reform occurs too often still others claim it comes not often enough dorothy shipp s reappraises the tumultuous history of educational progress in chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out shipp s chronicles how chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others to show why city schools have failed urban children so badly she traces chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s she also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates business people may be too wedded to a stunted view of educators to forge a productive partnership for change unionized teachers bridle at the second class status accorded them by managers if reform is to reach deeply into classrooms shipp s concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests this study clearly shows that in chicago as elsewhere urban schooling is intertwined with politics and power by reviewing more than a century of corporate efforts to make education work shipp s makes a strong case that it s high time to look elsewhere perhaps to educators themselves for new leadership
