john milton poet polemicist public servant and author of one of the greatest masterpieces in english literature paradise lost is revered today as a great writer and a proponent of free speech in his time however his ideas far exceeded the orthodoxy of english life spurred by his conscience and an iron grip on logic milton was uncompromising in his beliefs at a time of great religious and political flux in england in john milton david hawkes expertly interweaves details from milton's public and private life providing new insight into the man and his prophetic stance on politics and the social order by including a broad range of milton's iconoclastic views on issues as diverse as politics economics and sex hawkes suggests that milton's approach to market capitalism political violence and religious terrorism continues to be applicable even in the 21st century this insightful biography closely examines milton's participation in the english civil war and his startlingly modern ideas about capitalism love and marriage reminding us that human liberty and autonomy should never be taken for granted

in an era where sovereignty is no longer granted by bloodline but bestowed by bandwidth kingmaking kingslaying algorithm is a penetrating meditation on the architecture of digital power how it's built how it's worshipped and how it inevitably devours its creators this philosophical techno manifesto explores the evolution of influence in the age of the algorithm where identity is not discovered but constructed and where truth bends under the weight of engagement metrics kings are no longer born they are coded fame is engineered authenticity is monetized and the same machine that elevates you with a swipe can erase you just as quickly with a glitch divided into two sweeping parts genesis of the digital monarch and dethronement and the void the book dissects the lifecycle of online power through a framework as rigorous as it is poetic drawing eerie parallels between historic rulers like richard iii and napoleon and modern digital personas it reimagines the throne not as a physical seat but as a volatile algorithmic spotlight through chapters like the authenticity paradox the spectacle of the scapegoat and the commodification of the soul the text exposes how social platforms have become new theological spaces here rituals are replaced by reposts priests by influencers and confession by curated vulnerability aesthetic replaces depth visibility replaces truth power is decentralized but ever more invasive at the heart of it all lies the algorithm a ghostly unseen force that does not rule with violence but with prediction it knows what you want before you ask it shapes who you become by feeding back distorted reflections of your desire and it demands content not character this is not just a book it is a warning

a mirror and a manifesto it challenges readers to ask what is left of the soul when everything becomes a brand what is the cost of a crown that is worn in pixels and what happens when the same system that makes kings is designed to slay them ultimately kingmaking kingslaying algorithm offers not despair but clarity a call to awaken from algorithmic hypnosis and reclaim the right to exist unquantified it does not ask us to reject the digital realm but to navigate it with humanism nuance and the radical act of remembering who we were before we learned to perform ourselves

clinical research requires that some people be used and possibly harmed for the benefit of others what justifies such use of people this book provides an in depth philosophical analysis of several crucial issues raised by that question much writing on the ethics of research with human subjects assumes that participation in research is a distinctive activity that requires distinctive moral principles in most contexts we allow people to choose the activities in which they engage by contrast people are permitted to participate in research only after institutional review boards determine that it is appropriate for them to do so although we assume that consent to participate in research must be preceded by an elaborate disclosure of information we make no such assumption in many other areas of life although it is thought to be morally problematic to provide financial inducements to prospective subjects we make no such assumptions when we hire people as loggers fishermen and fire fighters although we readily accept the off shoring of manufacturing many regard the off shoring of medical research with great skepticism this book seeks to widen the lens through which we consider such issues when we do so we will find that many standard principles of research ethics are difficult to defend the book first argues that because respect for autonomy has been a central tenet of research ethics many have failed to recognize that the structure of the regulation of research is deeply paternalistic and have therefore failed to justify such paternalism the book then rejects the autonomous authorization model that characterizes most writing in bioethics and argues for a fair transaction model although many worry that the use of financial payment to recruit research subjects is coercive or constitutes an undue inducement the book argues that most of those worries are misplaced shifting its attention to research in developing societies the book considers the claim that international researchers exploit research abroad often exploits its subjects finally the book considers the claim that because researchers benefit from their use of research subjects they acquire special obligations to them or their communities

will procreation become just another commodity in the marketplace with designer sperm ova and embryos offered for sale will the attention and monies focused on the new reproductive technologies take away resources from infertility prevention prenatal care and adoption if states move to regulate such practices will this encourage widespread governmental interference in reproductive choice how will society look at the biologically unique children who are the products of genetic manipulation and more importantly how will these children view themselves this controversial book explores the answers to these questions that are frequently being asked as the battles over reproductive technologies and freedoms become more heated and touch more people s lives embryos ethics and women s rights examines both the clinical and personal perspectives of reproductive technologies experts explain and debate the growing number of procreative possibilities in vitro fertilization genetic manipulation of embryos embryo transfer surrogacy prenatal screening and the fetus as patient some of the leading

addressing the need for marshaling the resources of education to help promote a more civil society this book argues that education has a critical role to play in challenging the dominant views of politics and education service learning or academically based community service is seen as a promising educational pedagogy that can help students acquire civic virtue and serve as a mechanism to enable institutions of higher education become stronger community partners however there is currently is a lack of theoretical grounding for the service learning movement consequently service learning is in danger of being co opted by academic traditionalism which could vitiate service learning s social transformative potential and in fact undermine efforts at democratic revitalization the author provides a basic explanation of service learning and how it is connected to promoting civic virtue it examines the underlying public philosophy debate between weak and strong democracy theorists or procedural and civic republicanism this book argues that certain approaches to service learning such as the voluntarist or charity model the experiential education model and the justice model are ineffective because of their association with weak democracy theory or procedural republicanism the central argument of this book is that a progressive communitarian public philosophy maintaining that individuals attain meaning and significance in the context of community is the most appropriate grounding for service learning
