this state of the art handbook provides an authoritative overview of the field of perception with special emphasis on new developments and trends surveys the entire field of perception including vision hearing taste olfaction and cutaneous sensibility ideal for researchers and teachers looking for succinct state of the art overviews of areas outside their speciality and for anyone wanting to know about current research and future trends uses a tutorial approach that results in a balanced description of topics a selected readings section points to general references that provide more detailed treatments of each topic additional topics provide references to important topics written by noted authorities in the field now available in full text online via xreferplus the award winning reference library on the web from xrefer for more information visit xreferplus.com

the concept behind this book is to take a holistic view of food texture starting with the determination of food texture its perception in the mouth and its measurement by both sensory and instrumental methods and to examine the relation between them the book has been divided into four sections fundamentals sensory and human interactions instrumental analysis and food products essentially we cover the techniques used for measuring food texture and then apply them to the different product groups readers of the first edition will notice the title has changed with the adoption of the term texturology in the long history of food texture research texturology has been occasionally used in literature the term texturology has not been widely accepted by texture researchers texturologists because of their concern over whether the theories and techniques are broad and strong enough to support texture research as a scientific discipline during the 24 years since the publication of the first edition the editors have observed vast developments in theories as well as the assessment methodology of food texture both sensory and instrumental and these have shaped our understanding this second edition brings the science up to date by introducing topics not previously covered e g psychophysics tribology oral processing texture maps and special foods for dysphagia patients it includes an exposé of the instruments to measure food texture and also considers techniques for measuring consumer perception of food texture in addition to the sensory properties additionally it amends omissions

from the first edition such as dairy products fish bakery products and sugar confectionery as product groups all in all it is expanded and updated in its coverage of food texturology as a coherent scientific discipline

this book focuses on the design management and cybersecurity of connected and autonomous vehicles under the umbrella of the internet of vehicles both principles and engineering practice are covered from the design perspectives of communication computing and perception to its management an in depth study of a range of topics such as microscopic traffic behavior modeling and simulation localization v2x communication cooperative cloud edge computing and multi sensor fusion for perception has been presented while novel enabling technologies such as ris and blockchain are introduced the book benefits researchers engineers and graduate students in the fields of intelligent transport systems telecommunications cybersecurity and autonomous driving

the field of perception is devoted to explaining the operation of the senses and the experiences and behaviors resulting from stimulation of the senses perceptual processes such as recognizing faces seeing color hearing music and feeling pain represent the actions of complex mechanisms yet we usually do them easily the encyclopedia of perception presents a comprehensive overview of the field of perception through authoritative essays written by leading researchers and theoreticians in psychology the cognitive sciences neuroscience and medical disciplines it presents two parallel and interacting approaches the psychophysical or determining the relationship between stimuli in the environment and perception and the physiological or locating the biological systems responsible for perception are there any processes not associated with perception surely there are but the pervasiveness of perception is truly impressive and the phenomena of perception and its mechanisms are what this encyclopedia is about key features contains 16 pages of color illustration and photography to accompany the entries offers a varied and broad list of topics including basic research as well as methodologies theoretical approaches and real world applications of perceptual research emphasizes human perception but includes ample research because of its importance in its own right and because of what this research tells us about human perception written by recognized experts from many disciplines but for an audience with no previous background in perception students and members of the general public alike key themes action attention audition chemical senses cognition and perception computers

and perception consciousness disorders of perception illusory perceptions individual differences human and comparative across species not including ageing disorders and perceptual development methods perceptual development experience philosophical approaches physiological processes sense interaction skin and body senses theoretical approaches visual perception
