this book explains the design and fabrication of any electronic enclosure that contains a printed circuit board from original design through materials selection building and testing and ongoing design improvement it presents a thorough and lucid treatment of material physical properties engineering and compliance considerations such that readers will understand concerns that exist with a design structural environmental and regulatory and what is needed to successfully enter the marketplace to this end a main thrust of this volume is on the commercialization of electronic products when an enclosure is needed the book targets the broadest audience tasked with design and manufacture of an enclosure for an electronic product from mechanical industrial engineers to designers and technicians compiling a wealth of information on relevant physical phenomena strength of materials shock and vibration heat transfer the book stands as a ready reference on how and where these key properties may be considered in the design of most electronic enclosures

many chemicals used in the electronics sector have negative consequences for human and environmental health these include chemicals such as lead mercury brominated flame retardants halogenated flame retardants polyvinyl chloride pvc and phthalates typical electronic waste handling practices in developing countries are detrimental to the health of workers their environment and their communities there are issues associated also with formal recycling in modern facilities and the production phase is often problematic as well with electronics workers potentially being exposed to carcinogens and reproductive toxicants in addition it is becoming apparent that recycling of valuable materials must be made more efficient as the price of virgin materials metals and minerals increases and their availability decreases the problems are exacerbated by the fact that there has been a

rapid increase in sales of electronics in the past several years making e waste one of the fastest growing waste streams today in order to minimise any potential risks to human or environmental health electronics stakeholders in different stages of the life cycle of electronic products need information on what chemicals are present in the products their properties use and potential risks this report studies the extent to which existing information systems meet the needs of different stakeholder groups highlights information gaps and obstacles and discusses potential solutions to optimise the flow of information on chemicals in electronics the report is carried out within the unep project on chemicals in products

this book is intended to introduce and familiarize design production quality and process engineers and their managers to the importance and recent developments in concurrent engineering ce and design for manufacturing dfm of new products ce and dfm are becoming an important element of global competitiveness in terms of achieving high quality and low cost products the new product design and development life cycle has become the focus of many manufacturing companies as a road map to shortening new product introduction cycles and to achieving a quick ramp up of production volumes customer expectations have increased in demanding high quality functional and user friendly products there is little time to waste in solving manufacturing

problems or in redesigning products for ease of manufacture since product life cycles have become very short because of technological breakthroughs or competitive pressures another important reason for the increased attention to dfm is that global products have developed into very opposing roles either they are commodities with very similar features capabilities and specifications or they are very focused on a market niche in the first case the manufacturers are competing on cost and quality and in the second they are in race for time to market dfm could be a very important competitive weapon in either case for lowering cost and increasing quality and for increasing production ramp up to mature volumes
