production and manufacturing management since the 1980s has absorbed in rapid succession several new production management concepts manufacturing strategy focused factory just in time manufacturing concurrent engineering total quality management supply chain management flexible manufacturing systems lean production mass customization and more with the increasing globalization of manufacturing the field will continue to expand this encyclopedia's audience includes anyone concerned with manufacturing techniques methods and manufacturing decisions

this text has been developed through extensive research to reflect both the new

practices and traditional concepts that instructors feel are important for students to know. Starr uses real world themes such as quality technology, people and teamwork, globalization, service and manufacturing, environmental awareness and initiatives and problem solving. Four real world cases are included spotlighting Tom S of Maine, Rosenbluth International, Global Concepts Inc at Celestica's facility in Little Rock and the Saturn Corporation on quality, service, smart technology and the environment respectively. This text follows a systems approach that is both systematic and constructive. Starr integrates decisions with the functional areas of business whose challenge is to make the firm perform as a team. It combines the methods of analysis and synthesis which lead to better decisions and problem solving skills for complex situations.
